

PSMS Program Impact on Safety Culture

South Dakota/North Dakota Pipeline Safety
Operator Training Conference

Steve Allen

Executive Director,
Pipeline Safety (Energy Worldnet)

Topics to be Covered

Background:
Safety Culture and
PSMS

How an Effective PSMS
Program Impacts
Safety Culture

How to Measure Safety
Culture

What is Safety Culture?

“Safety Culture is the collective set of attitudes, values, norms, beliefs, and practices an Operator’s employees and Contractor personnel share with respect to risk and safety.”

API RP-1173 Introduction – Safety Culture

PSMS & Safety Culture

“A positive safety culture is essential to an organization’s safety performance, regardless of its size or sophistication.”

API RP-1173 Introduction – Safety Culture

PSMS & Safety Culture

“...although a positive safety culture can exist without a formal PSMS, an effective PSMS cannot exist without a positive safety culture. Therefore, Operators should actively work to assess and improve their safety cultures.”

API RP-1173 Introduction – Safety Culture

Safety Climate vs. Safety Culture

When the phrase Safety Survey or Safety Culture Survey is heard, most people think about occupational or personal safety.

Why is Safety Culture Important?

A positive safety culture influences diligence and intentionality regarding risk, and thereby can reduce human error and failure to follow procedures, which oftentimes leads to incidents.

PSMS Strengthens Safety Culture

“Establishing Safety as a core value strengthens the overall organization’s belief in its importance, acting as a unifying force to improve safety performance.”

API RP-1173 - Section 15

PSMS Strengthens Safety Culture

- An effective PSMS depends on the actions of every individual and organizational unit at all levels of the organization.
- Each element contributes to different aspects of the safety culture.
- The PSMS, with all its discrete elements, supports the culture, and the culture feeds back into the management system in a continuous process, yielding an increasingly mature organization.

API RP-1173 - Section 15

PSMS Elements & Their Contributions

1

**Leadership & Management
Commitment**

2

Stakeholder Engagement

3

Risk Management

4

Operational Controls

5

**Incident Investigation,
Evaluation, & Lessons
Learned**

6

Safety Assurance

7

**Management Review &
Continuous Improvement**

8

**Emergency Preparedness &
Response**

9

**Competence, Awareness,
& Training**

10

**Documentation &
Record Keeping**

Leadership and Management Commitment

Incentives, Stop Work Authority, Lessons Learned & Walk the Talk

Stakeholder Engagement

It 'heightens a sense of vigilance' regarding the identification & communication of risks.

Risk Management

See something – say something.

Operational Controls

Ensures the safe performance of the *pipeline system*.

Incident Investigation, Evaluations, & Lessons Learned

Create a safe place that employees & contractors speak up.

Safety Assurance

Evaluations, employee engagement, and reporting of feedback, ALL culture.

Management Review & Continuous Improvement

Management Commitment + PDCA = Priority of Safety

Emergency Preparedness & Response

Provides a realistic sense of vulnerability & enhanced vigilance.

Competency, Awareness, & Training

Offer the support that employees and contractors need.

Documentation & Record Keeping

If you didn't document it, you didn't do it!

Assessing Safety Culture

“The pipeline Operator shall **establish methods to evaluate the safety culture** of its organization.”

API RP-1173 Section 10.2.4

4 Steps to Assessing Safety Culture

Review of Operator Policies,
Procedures, & Documentation

Employee Perception
Survey

Field Observations

Analysis of Results
for Alignment

Step 1

Review of Operator
Policies, Procedures, and
Documentation

Review Operator Policies, Procedures, &
Documentation of Communications:

- Safety Priority & Accountability
- Non-punitive Reporting
- Questioning & Learning
- Incentives/Compensation
- Communications: Transparency & Reporting
- Lessons Learned & Near Misses
- PSMS Program
- Stop Work Authority
- Governance & Risk Management

Step 2

Employee Perception Survey

Important Aspects of a Safety Culture Survey

- Measures perception of positive and negative safety culture indicators
- Results in a Numeric score with visual dashboards
- Establishes a baseline for comparison to future surveys
- Anonymous

Positive

- Safety Priority
- Accountability
- Empowerment & Ownership
- Communication/Transparency
- Procedural Compliance
- Employee Satisfaction
- Inspires, Enables, & Nurtures Change When Necessary
- Promotes a Questioning & Learning Environment
- Encourages Non-Punitive Reporting

Negative

- Complacency
- Fear of Reprisal
- Over Confidence
- Normalization of Deviance
- Tolerance of Inadequate Systems and Resources
- Production Pressure

Step 3

Field Observations

Field Observations:

- Employee Interviews
- Focus Groups
- Job Site Visits - Watch

Confirm Policies & Procedures **are Followed**
Validate Employee Survey Perceptions

Step 4

Analysis of Results for
Alignment

Analysis of evidence gathered from:

- Policies, Procedures, & Documentation Review
(What Company Says)
- Employee Perception Survey
(What Employees Perceive)
- Field Observations
(What is Actually Occurring)

Determine Alignment

Identify Gaps & Opportunities

Portal Dashboard

Safety Culture Survey Results

Leadership & Management Commitment

Stakeholder Engagement

Risk Management

Operational Controls

Incident Investigation & Lessons Learned

Safety Assurance

Management Review & Continuous Improvement

Emergency Preparedness & Response

Competence, Awareness, & Training

Documentation & Record Keeping

Each Survey Question Tied to One Element

Indicator Results

Complacency

Fear of Reprisal

Normalization of Deviance

Tolerance of Inadequate Systems or Resources

Employee Empowerment

Each Survey Question Tied to Two Safety Culture Indicators

Safety Culture Survey Scoring

7.2

Leadership & Management Commitment

7.1

Stakeholder Engagement

6.4

Risk Management

7.5

Operational Controls

5.7

Incident Investigation & Lessons Learned

6.6

Safety Assurance

5.5

Management Review & Continuous Improvement

5.2

Emergency Preparedness & Response

4.1

Competence, Awareness, & Training

6.1

Documentation & Record Keeping

Overall Safety Culture Score

6.5
