Commissioner

Docket Number: HP14-002

I oppose the construction of the proposed Dakota Access crude oil pipeline because it will pose a threat of serious injury to the environment and current or future inhabitants.

The damage caused to any of the lakes and rivers the pipeline is set to cross would be devastating to local wildlife and the fisheries GF&P maintains.

The pipeline spill into the Yellowstone River this past January shows clearly even how a monitored pipeline can cause significant harm to people and the environment alike.

We know pipelines leak. It's a matter of when and how much - not if. When the pipeline leaks near the populated areas of Tea, Harrisburg, and Wall Lake where I live, our property values will plummet. It will constitute a taking of our great investment in real property as our homes' resale values fall. Who will make us whole when that happens?

The potential impact of an oil spill or leak to water and land quality for both private and public lands would be devastating and costly to South Dakota's communities.

The remedy that I seek is to outright deny a permit to construct the Dakota Access crude oil pipeline in South Dakota.

Dear PUC,

Please do not award domain access to this Texas company, companies. If some company decided that they wanted to build a pipeline that transported a caustic dangerous substance through your backyard, or land that you own, for the sake of business, I'm sure you would agree that it is not only unethical to owners, but also life threatening to the ecosystem. When this pipeline breaks or leaks (all pipelines do or will eventually break), we are left with the mess that will forever change the land resources, ecosystem, aquifers, and wildlife. Please reject this proposal. It's unfair to the people whose land it will traverse and it awards the dollar over the rights of people, our precious resources, land, water and our South Dakota ecosystem. Don't sell out to them. Please reject this proposal.

Thank you,  
Nancy Cutshall
