Subject: Re: FW: HP14-001: No on Keystone XL
Auto forwarded by a Rule

Dear South Dakota Public Utilities Commissioners Hanson, Nelson, and Fiegen:

The citizens of South Dakota can't risk having this unnecessary and dangerous pipe line go through our state. The Indian tribes reject having it cross their reservations. Treaties with the tribes will have to be scraped if this pipeline is to succeed. Does the state really need to break yet another treaty with the tribes? The Keystone people have a long list of unsafe pipelines already and we don't need another. We have no assurance or commitment from Keystone that they'd clean up any mess they make of our fair state. The oil from the tars ands flowing through this pipeline will not benefit South Dakota or the United States in any way. For these reasons and more, reject Keystone XL.

Please reject the Keystone XL Pipeline certification in docket HP14-001. The risks this pipeline and its construction pose to the health, safety, and security of South Dakota's water, land, and people are unacceptable. TransCanada has lied to the people of South Dakota about the benefits of the pipeline, while ignoring completely the harmful impacts of tarsands mining and the risk to our land and water from inevitable spills.

This project needs to be rejected once and for all and put behind us. South Dakota deserves better than to have our state ruined by foreign companies. Please do what is right for our state.

Sue Grant
