**Subject:** [EXT] Keystone XL pipeline vote

Hello,

I am writing about the vote that is coming up on the Keystone XL pipeline. The new route that has been proposed has not been studied and its impact on the environment and communities has not been looked at. It will cost the American tax payers millions of dollars or more to complete this study. I am against this. It was promised that American steel would be used to build the pipeline. That will not happen. The materials are already made and ready sitting out in the weather and elements for the past year and a half plus. It was promised that it would create American jobs. It will not. It was promised there would be no impact to the environment whatsoever. The current pipeline has had 3 leaks, one major one recently. In order for this project to continue it will cost millions if not billions and the American tax payer gains nothing in return. This project is not good for America. The cost is great with no return. Please vote against this project.

Thank you,  
Janine Nardo
