I received a document from Transcanada stating they did not believe I have the right to party statues because I do not live in South Dakota. I live 35 miles from South Dakota and a few miles from where they want to cross Nebraska through the Sand Hills, this is the same project and the same tarsands and chemicals running through the pipe. We are all in the United States which is effected when it leaks and we have to help clean it up with our tax dollars which you will not be able to clean the Ogallala Aquifer which does not know the South Dakota and Nebraska boundary line but we all drink and our living depends on it. I do not know why a foreign company thinks they have more party statues than a United States citizen.

Therefore I feel we should be granted party statues and I still think the PUC should deny the request of by Transcanada to reissue the permit.

I appreciate the help the PUC staff has given us with the process.

Thank you
