RE: HP14-001

To: South Dakota Public Utilities Commission, TransCanada and Intervenors in the Keystone XL Permit Hearings.

RESPONSE TO KEYSTONE'S MOTION TO DEFINE THE SCOPE OF DISCOVERY UNDER SDCL 49-41
B-27

I wish to make an objection to Keystone's motion for the following reason: I disagree with the second point made in TransCanada's motion because it would eliminate about 80 of the 115 Findings of Fact of the permit from the scope of discovery. I contend that all facts need to be made available.

I request that the entire 2010 permit to be included in discovery available to the SD PUC and the Intervenors.

Respectfully Submitted,

Gena Parkhurst
