SOUTH DAKOTA PUBLIC
UTILITIES COMMISSION

28 Feb 2017

TO: Kristie Fiegen

I want to Thank you for your Letter.
Havent had reply from other Government
units.

So, As your Letter stated the City of Sioux Falls
and water entity Allowed the provision of
placement of the Line and storage Tanks
Near the river in the permit. I dont
see that very smart. They failed to see
The possibility of spills and pollution of the
river in the future. Nor did you warn them?

Your Applicant Responsibility
will not pose a threat of serious injury
to environment or the social or economic
condition of inhabitants, or expected inhabitants
in sitting Area. I have friends that have
left Sioux Falls already. (scared)

Other Responsibility

I feel that in time will be broken. Because
of the record of spills of this company. They
had 14 spills in 12 months on the last line they built
over 300 spills in last 5 years of the other lines they own.

THIS IS A

SOUTH DAKOTA PUBLIC

UTILITY COMMISSION

They used Chinese made pipe here in Iowa

I talked to one of the welders. He told me that they had to cut bad metal off to get a good weld.

That makes me worry about spills or breaks.

We had a break in Marshall County, spilled 100,000 gal of Diesel from 20" supply line. Covered 3 acres

clean up! remove the top soil. Heard

Northern N. Dakota AND CANADA, had similar spills.

After large spill, explosion and 24 hr fire

killed 1 and injured 20. IN ALABAMA fuel line

so you CAN understand my concern about

the city of Sioux Falls, S.D. The crude

from S Dakota is very flammable as test

at Iowa state U. showed!

I hear President AND EPA Director own

part of the pipe line and are pushing its completion.

students from Oklahoma that are in college with

my daughter know more about the line and the

EPA Director. They don't like his ideas of Ecology

or lack of it. I'm for clean water!
