

## Pipeline

Saudi Arabia reduced crude <sup>oil</sup>  
dramatically - cheap oil.

### 1. Environmental and Economic <sup>Least</sup> Impact

a. failed to consider either one

1. Need an accurate proposed route and alternate routes. Plan drawn thru residents - We need detailed <sup>routes</sup>

2. pipeline leaks - need right to access line forever

### 2 Follow the money.

a. Houston based company constructing the pipeline  
b. Houston refining companies will market the fuel according to the world mkt. price.

c. We will <sup>lose</sup> control of our own natural resources.

### 3. A very wise program for the years in the future would be to control our energy as much as possible to strengthen our midwest economy.

a. We have millions of acres of high producing ag land. We need an adequate supply of fuel produced at minimum cost.

b. We live in a world where terror strikes unpredictably - (twin towers) one of many; how long before they would target Houston, the oil capital of the world?

(Make a long term) c. It makes no sense to build the wealth of the oil claim - better to avoid the problem! fortunes by giving them our crude to refine and then price it back to the midwest market at World Prices!
