

16 Margaret Hilt, and I inherited the farm in 1988, when my mother passed away. We  
17 continue to rent the farmland to a farmer, Doug Vanderwerff, who grows corn and  
18 soybeans on it. My two daughters and my two nephews will someday inherit the farm  
19 from my sisters and me. They plan on continuing to own the land and rent it out. One  
20 daughter, Laurie Kunzelman, has been thinking about building a home on the farm.

21 **Please describe your current farming operations.**

22 We rent out the farm for cash rent. The tenant farmer, Doug Vanderwerff, grows corn  
23 and soybeans, and has a little hay land on the half section. This man has been farming  
24 our land for about 30 years and plans to continue to do so.

25 **To the best of your knowledge, what area(s) of your property will the Dakota Access  
26 Pipeline cross?**

27 The pipeline would cross the east quarter section (160 acres) of the farm from the  
28 northwest corner to the southeast corner, effectively cutting that quarter section in half.

29 **How close is the pipeline to any building, bin or pen, water source, or farming  
30 facilities (i.e., storage area, feedlot, grazing area, etc.)?**

31 The pipeline would run approximately 50 feet from the land surrounding the farm  
32 buildings and the windmill, which provides water for the house.

33 **Please describe any special characteristics of your property and farmland, and/or  
34 whether you plan to build any houses, outbuildings, shelter belts, or other structures  
35 on your property.**

36 My land has cement tile going from a pond north of the house to the road ditch south of  
37 the house. The proposed pipeline **would** cross this tile. There is also tile a short distance  
38 west of this tile. I'm not sure if the pipeline would cross that tile or not.

39 My daughter, Laurie Kunzelman, has been considering building a home on the southeast  
40 corner of the farm, but the pipeline would prevent that. My sisters and I have also  
41 considered selling one acreage on the northeast corner of the farm.

42 **Please describe which of your farming operations or other land uses will be**  
43 **impaired by the Dakota Access Pipeline and how they will be impaired.**

44 Corn and soybeans are both grown yearly in alternating areas in that quarter section of  
45 the farm. The pipeline would severely cut down on crop production of each of them.

46 The tenant would lose acres to plant, receive much less income from that quarter section,  
47 and it would inconvenience him when trying to farm the land, with the pipeline cutting  
48 that quarter section in half. Consequently, he would be unwilling to pay as much rent per  
49 acre, so we would be losing income. No one else would be willing to farm it either, with  
50 that pipeline running through there. Also, if we did try to sell any acreages, people would  
51 not want to buy and build on the land with that pipeline under it. Dakota Access would  
52 not allow any buildings on the easement, either.

53 **Has your farmland been improved with drain tile? If so, please describe whether**  
54 **you are concerned that pipeline construction may damage and impair the drain tile**  
55 **performance and investment.**

56 Yes, this quarter has two areas of drain tile. The pipeline would cross at least one of  
57 them. The tile is cement and quite old. I am very much afraid that the tile would be  
58 damaged. Then the water would not drain out of the low area and could reach the house  
59 and other buildings. It would be very costly to replace the drain tiles if they were  
60 damaged. I'm also afraid oil could get into the tiles and into the water if the tiles were  
61 broken.

62 **Do you believe that the Dakota Access Pipeline will pose a threat of serious injury to**  
63 **the environment or the inhabitants within the siting area? If so, why?**

64 Yes, I definitely believe the pipeline would pose a threat to the environment and the  
65 inhabitants of this farm. The oil could leak onto the land and into the water as it has often  
66 done in many other areas. The oil could flow into Little Beaver Creek which runs through  
67 the farm. Then it could get into Beaver Creek, and subsequently into the Sioux River and  
68 the aquifer. The oil in this pipeline is a highly volatile substance. Pipelines explode,  
69 rupture, and leak. Even with shut-off valves, a great deal of oil would escape into the  
70 environment. If the pipeline exploded, it could definitely hurt or kill people and animals  
71 in the area. Also, the oil could be poisonous and carcinogenic to the people and animals  
72 in contact with it. I have designated wetlands on my farm which could be threatened by  
73 the pipeline.

74 **Do you believe that the Dakota Access Pipeline will substantially impair the health,**  
75 **safety and welfare of the inhabitants of the siting area? If so, why?**

76 Yes, it will most definitely impair the financial welfare of the tenant farmer and the  
77 landowners (us), due to the amount of land that will be dug up all the way across that  
78 quarter section. Crops will not be as good. This could happen again and again, anytime  
79 the pipeline company would decide to go back in and dig it up to put more pipes in, or to  
80 work on them for some reason. Yet the pipeline company is only offering a onetime  
81 lump sum payment. I am also concerned that stray voltage could affect the health, safety,  
82 and welfare of the tenant farmer, the residents, and anyone else near the pipeline. As I  
83 stated before, the oil itself could affect the health, safety, and welfare of everyone in the  
84 area because of the volatility of the oil and the chemicals that the oil contains. Dakota

85 Access cannot guarantee the safety of the pipeline. There have been more pipeline  
86 accidents than train accidents involving oil.

87 **Have you been sued by Dakota Access Pipeline to compel court ordered access to**  
88 **your land? If so, (1) Has Dakota Access Pipeline provided you any legal authority**  
89 **(i.e., state statute) supporting its claim that you have no right to exclude Dakota**  
90 **Access from your land at the time of said lawsuit? and (2) Have you incurred legal**  
91 **fees in defending against said lawsuit?**

92 Yes, Dakota Access has filed a lawsuit against us to allow them to enter our farm to  
93 survey it. I told them "No" two different times, that they could not enter our land.

94 Yes, we have hired a lawyer, Glenn Boomsma, to represent us in this matter. This is  
95 costing us a great deal of money.

96 **Has Dakota Access Pipeline made any statements to you that it is a "common**  
97 **carrier" under South Dakota law? If so, please describe.**

98 No, they did not.

99 **Has any representative of Dakota Access Pipeline made any statements to you or**  
100 **others that you believe are not true? If so, please explain.**

101 Yes, first of all they told me that I should allow them on my land. If I don't, they will  
102 just take it by eminent domain, anyway. However, they do not have the right of eminent  
103 domain as of yet.

104 Secondly, they told Rhonda Nielsen, who lives in the house on that quarter section, that  
105 my sisters and I had agreed to let Dakota Access enter my land, survey it, and build the  
106 pipeline there. They also told her there was nothing she could do about it. Rhonda was  
107 very upset that we would do this. We never gave them permission to enter our land,  
108 survey it, or build the pipeline there.

109 **Please state any other concerns you have regarding the Dakota Access Pipeline.**

110 South Dakota and Iowa both grow large amounts of corn. Ethanol producers in South  
111 Dakota use much of this corn to produce ethanol, which greatly helps the economy of  
112 South Dakota. The oil pipeline will benefit the economy of North Dakota and Texas, but  
113 will be of only a small benefit to the economy of South Dakota. That oil is a non-  
114 renewable source of fuel and produces greenhouse gases. Corn is a renewable source of  
115 fuel. South Dakota should be putting all of its effort into increasing the supply and  
116 demand for ethanol. This would be much more beneficial to the farmers and to the state.

117 **Would you be available to present testimony and respond to questions during the**  
118 **formal hearing scheduled for September 29 through October 8, 2015?**

119 No. I am 89 years old and have recently had my left knee replaced. It is still giving me a  
120 great deal of pain.

121 I give my permission for my daughter, Laurie Kunzelman, to speak on my behalf during  
122 the formal hearing. Her address is 3604 East Woodsedge St., Sioux Falls, SD 57108.

123 **Does that conclude your testimony?**

124 Yes.
