To Whom It May Concern:

My name is Jacob Limmer and I am a resident of Hamlin County, South Dakota. I would like to respectfully submit comments for the public record concerning the Public Utilities Commission meeting in Groton on February 3rd, 2005.

I feel that, as a state, we should be putting a much greater emphasis on wind energy development. Wind energy is renewable, cost effective, and most importantly, a resource that our state possesses in abundance. With Basin realizing additional capacity on their transmission system in conjunction with the excellent wind potential in the Groton area a gas-fired turbine makes little sense.

I would strongly urge the PUC to use their influence and expertise in facilitating wind energy for the extra transmission capacity instead, or in addition to, energy produced through natural gas.

Thank you for your time and consideration.
