

**DATA REQUIREMENTS**  
**PURSUANT TO DOCKET NO. F-3563**

1. Background

The currently effective Rates 95, 96 and 97 were filed on June 5, 2006, and were approved by the Commission on August 24, 2006. The energy payments currently on file for these rates were generated by Montana-Dakota's production costing model (ProSym) for the 12 months ending June 30, 2007. The capacity payments in effect for Rates 96 and 97 are based on the projected costs of an installed peaking facility and baseload unit, respectively. In addition, in accordance with the Commission's Decision and Order (F-3365), the currently effective rate schedules reflect the fact that no capacity payments will be made until capacity can actually be shown to be avoided.

After reviewing the metering charges and energy and capacity payments currently on file for Rates 95, 96 and 97, Montana-Dakota believes that these rate schedules need to be updated to reflect the projected metering costs and the avoided energy and capacity costs for the test year of July 1, 2007 through June 30, 2008. The methodology used in developing the proposed energy payments is identical to that used in developing the currently effective rates. The meter charges filed reflect updated meter costs and carrying charges.
