Re: Road Inspections for Deer Creek Station Construction Routes
BAI. No. 20953.02.02

BY:

Dear Mr. Clark,

As addressed in previous correspondences, Basin Electric Power Cooperative (BEPC) hired Banner Associates to perform a pre-construction inspection in 2010 and a post-construction inspection this summer performed by Rich Uckert, Banner Associates, for all county roads and township roads affected by construction of the Deer Creek project.

From our inspection, there appears to be a portion on 482nd Avenue with asphalt failure at the intersection of US Highway 14. It will be BEPC's responsibility to hire and compensate a contractor for all labor and materials to repair this area to the county's specifications.

Please confirm your agreement that the repair of the asphalt fulfills Brookings County's expectations that the county roads have been returned to a condition comparable to their condition prior to construction by returning a signed copy of this letter to Banner.

If you have any questions or require any additional information, please feel free to contact me at 692-6342.

Sincerely,

Brad Wermers, PE
Banner Associates, Inc.
