**Auto forwarded by a Rule**

We have been residential customers of Black Hills Power for over 30 years. We have great concern over the requested 26.6% rate increase by Black Hills Corporation. Some of us are having great difficulty covering all of our fixed costs as it is. This huge increase would not only increase our residential rates, but the trickle down of the other entities and businesses raising their rates and fees to cover these costs would be disastrous to us and many other people. I implore you not to approve this large increase at this time.

Thank you,  
Roger and Sharon Delzer
