Subject: BHPL increase
Auto forwarded by a Rule

This is the worst possible time for any type of utility bill to raise. This will take money directly out of the pockets of the business owners here, as well as increase their own expenses. It will cause rents to increase and lead to more homelessness. This time it will be more families than single people who will be homeless. Some families will move back home to their parents which will simply increase utility costs on the older people. This is an unreal amount, and there is no excuse for the bad management BHPL has shown and no excuse for taking it out of the hides of the consumers.
