Subject: proposed rate increase for BHP
Auto forwarded by a Rule

As a BHP customer it is very hard to understand how they can ask for such a high increase after giving so much money away to the SDSMT to study "wind" power. This is such a bad time to ask for that increase, I would have very hard time, if not impossible, paying such an increase in my already high bill. I am sure there are ways to cut costs so they would not need that increase at this time.
