Subject: BH Corporation rate increase

Mr. Hanson,

I would encourage yourself and the PUC to consider the significant financial impact of the proposed rate increase by BH Corp. I truly feel any rate increase this soon after the last rate hike is too much. Our district is still feeling the financial strain of the last rate hike. This 9-10% increase will add another \$50,000 annually to an already large electrical utility bill. To put it in perspective, this 50,000 expenditure would consume 14% of the proposed 3% increase in state funding for

education. I would much rather put that revenue into the pockets of our employees than line the pocket of a corporation that has cash reserves like BH Corp.

To conclude Mr. Hanson, I ask for the assistance of the PUC in minimizing the impact of future rate increases to educational entitites.

Have a great day!
