**Subject:** FW: NorthWestern Estimate to serve B-Y Water

Pete,

As per your request, I have put together an estimate to serve a B-Y Water installation on the corner of W 11<sup>th</sup> St and Timberland Drive just west of Yankton. Cost estimate to this location came to \$38,000. NorthWestern has an obligation to its rate payers to recover the costs of an installation in a reasonable amount of time. With this estimate and a minimal projected electric load, single phase 200Amp panel, it would take decades to recover the cost. NorthWestern would pursue aid to construction costs for that full amount.

If you have any further questions please let me know.

Regards,

James (Jake) Harens
