Xcel Energy

Docket No.: EL14-040

Response To: South Dakota Public
Utilities Commission

Data Request No. 1-4

Requestor: Darren Kearney

Date Received: December 1, 2014

Question:

For the commercial lighting rebates provided in 2013, what percentage of total rebates resulted from fluorescent lighting and, similarly, what percentage of total rebates resulted from LED lighting?

Response:

Below is a table providing the sum of rebates for each category of measures and their corresponding percentages.

Rebate Type	Sum of Rebate*	Rebate % of 2013 Rebate Total
Fluorescent	\$338,558	61%
LED	\$199,598	36%
Other**	\$19,625	3%
Grand Total	\$557,781	100%

* The rebate dollars listed here differ slightly from actual rebates paid. Actual rebates are capped at 60 percent of the project costs, which is calculated just prior to check issuance. Due to limitations of our tracking software we are only able to report total 'potential rebates' by category for purposes of this response. Total actual rebates paid in 2013 were \$524,476 – a difference of six percent.

** This includes rebates paid on control measures such as occupancy sensors and photocells.
