Hello Les

I was just going over your newest revised quote that you have sent to Chad, Amy and I have a few questions to clear everything up before we get to the PO writing time. As of now we believe by 5-1-19 we will have all the funding so we will be able to finalize material.

Will you please add a line item on the proposal that states that you took the new quantities off the IFR drawings that Chad sent to you. Then one more thing I need to ask and make clear is that we need to know if Water and Electricity is also included in your price.

If you can answer and add that material to your quote and resend it that would be great.

Thank you

Les

As per our conversation, Fagen is getting close to contract on the Willow Creek project. We are currently scheduling a batch plant on site mid July to the first part of November.

Concrete quantities without waste are now at 1520 cy of 2000 psi and 12,546 cy of 5000 psi. Attached are the foundation drawings and specifications

Please provide updated pricing based on this info. Reducing the 5000 psi pricing if able. Providing one batch plant with the backup portable plant. As we talked about the chiller will probably not be required. Thanks.
