RE: Glen Lowrie Service

Dear Ron Gogolin:

Central Electric is willing to provide single phase electrical service to the proposed drain tile pump system located in the southeast quarter of section 09 of 101 North, Range 60 West, pending Northwestern Energy's territory release. Central Electric currently has existing electrical infrastructure within 500 feet of the requested new service location. If your company would be in agreement with this, as per this consumers request to have Central Electric provide electrical service, please prepare the necessary documentation to facilitate the request for PUC approval. Please contact me if you have any questions regarding this information.

Sincerely,

Brian Bultje
Operations Manager
