

Exhibit 18

No. 5

- 5-4) Please refer to Table 7 of the direct testimony of Mr. Roger Schiffman. Please respond to the following and provide the information in Excel spreadsheet format:
- a) Please explain if the capacity listed is installed or accredited.

ConEd Response: The capacity listed in Table 7 is summer reserve capacity. These are the data reported by ABB/Ventyx in its Reference Case supporting materials

- b) Please provide the installed capacity and accredited capacity for each fuel type.

ConEd Response: Juhl executed a 3-month study license for PROMOD in completing this study, and is no longer able to access the underlying input database, absent incurring re-licensing fees. We are attempting to construct this requested data from output data files, and will provide if successful. This level of detail was not stored in study workpapers.

- c) Regarding the Renewable Column, please separate out by renewable type.

ConEd Response: Juhl executed a 3-month study license for PROMOD in completing this study, and is no longer able to access the underlying input database, absent incurring re-licensing fees. We are attempting to construct this requested data from output data files, and will provide if successful. This level of detail was not stored in study workpapers.

- d) Please provide the documentation and references for the data shown in this table.

ConEd Response: These are the data reported by ABB/Ventyx in its Reference Case supporting materials

- e) Using the same year by year format, please provide the load and resource balance (resource plan in accredited capacity by fuel) separately for each Local Balancing Area within SPP_DAK.

ConEd Response: Juhl executed a 3-month study license for PROMOD in completing this study, and is no longer able to access the underlying input database, absent incurring re-licensing fees. We are attempting to construct this requested data from output data files, and will provide if successful. This level of detail was not stored in study workpapers
