SOUTH DAKOTA PUBLIC
UTILITIES COMMISSION

Dear South Dakota Public Utility Commission,

My name is Clara Luvaas and I am a resident of Clark County South Dakota and I also reside and own land in the Crocker Wind Farm Project Area. I have resided in northern Clark County all but eight years of my life and have always enjoyed the farming/ranching industry. I am in total support of this wind project.

I am supportive of this project because it can be beneficial in so many ways. This project would increase the tax revenue for all of the Clark County residents, would help the local townships and be a huge benefit to the local school system. It would create more local jobs, economically boost the local businesses and lastly it truly would be a financial security to a large

number of farmers/ranchers that want to pass their farms on to the next generation.

I personally believe that the Crocker Wind Farm personnel team are very honest, dedicated workers and deeply care about the local people and the community.

As I have stated before I am in total support of the Crocker Wind Farm project and what better way to utilize the wonderful South Dakota wind than to produce power for the consumers.

I personally would like to thank you as a board for all your time and consideration of such an important project.

Sincerely,
Lisa Luvass

Clara Luvaas
