ABOUT YOUR ELECTRIC RATES

Basic Service Charge
 Fixed monthly charge for certain fixed costs (metering, billing, maintenance, etc.)

Demand Charge
 Charge to commercial and industrial customers for the fixed costs of the electric capacity required to meet the peak electric loads on Xcel Energy's system. The charge, which is adjusted seasonally, applies to the highest 15 minute kW demand during the billing period.

Demand Side Management
 South Dakota Public Utilities Commission-approved tariffs allow Xcel Energy to recover costs of energy efficiency and load management programs.

Energy Charge
 Charge per kWh of electric usage to recover the variable costs of producing energy.

Environmental Cost Recovery
 South Dakota law allows Xcel Energy to recover the costs of significant environmental improvements at three of Xcel Energy's fossil fuel power plants.

Fuel Cost Charge
 Charge per kWh to recover the costs of fuel needed to run Xcel Energy's generating plants, as well as the cost of purchasing energy from other suppliers.

kWh
 One kilowatt-hour (kWh) is a unit of electrical usage. One kWh equals 1,000 watts of electricity used for one hour. This is enough electricity to light a 100-watt light bulb for 10 hours.

Infrastructure Rider
 South Dakota Public Utilities Commission-approved tariffs allow Xcel Energy to recover costs of eligible capital projects and property taxes not otherwise recovered in rates.

Transmission Cost Recovery
 South Dakota law allows Xcel Energy to recover costs associated with new investments in the electric transmission system necessary to deliver electric energy to customers.
