

Otter Tail Power Company installed a required air-quality control system at Big Stone Plant to reduce emissions of sulfur dioxide and nitrogen oxides based on technology approved and adopted by the South Dakota Department of Environmental and Natural Resources. We also installed pollution-control equipment at Hoot Lake Plant to comply with the Mercury and Air Toxics Standards.

To recover costs associated with these projects, the South Dakota Public Utilities Commission approved an update to our Environmental Cost Recovery Rider (ECRR). Beginning November 1, 2017, the ECRR will decrease from \$0.00536 per kWh to \$0.00484 per kWh for all classes of service. For more information contact Customer Service at 800-257-4044 or place an inquiry from our website at otpc.com.
