

## Projected Savings from LimeLite® Night Light Installation

### LimeLite® Night Light installation inputs and assumptions:

Average length of use:	<b>4,380</b> hours per year <sup>1</sup>
Average night light uses:	<b>7</b> watts
Retrofit night light uses:	<b>0.03</b> watts
Product life:	<b>10</b> years <sup>2</sup>
Energy saved per year:	<b>31</b> kWh per year
Energy saved over life expectancy:	<b>305</b> kWh
Installation / participation rate of:	<b>75.68%</b> <sup>3</sup>
Number of participants:	<b>1,202</b> <sup>3</sup>

### Projected Electricity Savings:

The LimeLite Night Light installation projects an <b>annual</b> reduction of:	<b>27,769</b> kWh
The LimeLite Night Light installation projects a <b>lifetime</b> reduction of:	<b>277,695</b> kWh

<sup>1</sup> Assumption (12 hours per day)

<sup>2</sup> Product life provided by manufacturer

<sup>3</sup> Data reported by program participants
