

The proposed power line for Crown Ridge is too close to our home and right out our front window

At the meeting in Waverly Next Era said they run their power lines down the center of the section when ever possible to keep it away from houses.

At the meeting Next Era said they would work with me. Now Tyler Wilhelm says he cant move the line because it is already a done deal.

We live in section 21 Waverly township and want the line moved to the center of section 22

Mr Nelson seemed interested in our problem

Thank you for your time
