**RE: SDCL 1-19A-11.1 Consultation**

Project: 190111003S – Deuel Harvest North Wind Farm, Study Plan for Intensive Surveys  
Location: Deuel County  
(PUC)

Dear Mr. Gasper:

Thank you for the opportunity to comment on the above referenced plan. On March 25, 2019, the South Dakota Office of the State Historic Preservation Officer received your e-mail and the document entitled “Study Plan for Cultural Resources Level III Intensive Surveys for the Deuel Harvest North Wind Farm.”

Based on the information provided, we agree with the survey strategy outlined in the study plan such that Invenergy LLC will have Burns & McDonnell Engineering Company, Inc. conduct additional Level III Intensive survey of the Component Footprint including buffers around most of the Project components.

We also agree that cultural resources identified during the additional survey be recorded on the appropriate South Dakota Form. Information about the survey forms can be found on our website at [history.sd.gov/preservation/SHPOdocs.aspx](http://history.sd.gov/preservation/SHPOdocs.aspx). Our website also provides a list of historic context documents meant to help evaluate the historic significance of properties identified during the survey.

Finally, we recommend that the proposed Unanticipated Discoveries Plan contain information about the unanticipated discovery of human remains pursuant to South Dakota Codified Laws, Chapter 34-27-25, Chapter 34-27-26 and Chapter 34-27-28.

We appreciate Invenergy’s additional efforts to identify and take into consideration the non-renewable resources of South Dakota. If you have any questions or concerns, please contact Paige Olson at [Paige.Olson@state.sd.us](mailto:Paige.Olson@state.sd.us) or (605) 773-6004.

Sincerely,

Jay D. Vogt  
State Historic Preservation Officer

Paige Olson
