Brian:

Thank you for your message regarding the tax reform docket currently being processed by the South Dakota Public Utilities Commission. I encourage you to follow along as this docket is processed and proposed plans are filed by each investor-owned utility as to how the tax savings will be passed on to customers. As a commissioner, I will be looking for savings that are shared with all consumers of each utility in a just and reasonable manner.

Since this is an open docket, your message and my response will be posted in the online docket for my fellow commissioners and others to access. Here is a link to the docket:
