Looking for tech funds, Mickelson seeks \$ tax on pack of 20 cigarettes

BY BOB MERCER
American News Correspondent

PERRE — The legislator who's sponsoring two possible ballot measures asking voters to raise tobacco taxes in South Dakota said he wants the money to help fund the public technical institutes in the state.

Rep. Mark Mickelson, R-Sioux Falls, said Thursday he'd circulate what's labeled "Version 2." It proposes adding \$1 of state tax to a pack of 20 cigarettes and increasing the state tax on other tobacco products such as cigars and smokeless to 55 percent of wholesale price.

South Dakota's current tax rates are \$1.53 for a 20-pack of cigarettes and 35 percent of wholesale price for other tobacco products. The proposal also calls for creating a tuition reduction and workforce-training fund for technical institutes in South Dakota.

Version 2 says \$20 million of tobacco taxes shall be deposited annually in the technical institute fund.

State laws already required the first \$30 million of tobacco taxes to be deposited in state government general funds and the next \$5 million of tobacco taxes to be used for the tobacco prevention and reduction trust fund.

South Dakota can expect to receive an estimated \$55 million from tobacco taxes for the current 2018 fiscal year that began July 1, according to the revenue forecast adopted in March by the Legislature.

No estimates have been made for fiscal 2019 or 2020. The Mickelson tax increases would take effect July 1, 2018, making their revenues part of the fiscal 2020 number.

Currently, there are four institutes that would receive the Mickelson money. Local public school districts operate them. They are Mitchell Technical Institute at Mitchell, Lake

Area Technical Institute at Watertown, Western Dakota Technical Institute at Rapid City and South-east Technical Institute at Sioux Falls.

Mickelson said Thursday he didn't know how much money the technical institutes needed when he submitted the two ballot measures.

He said he doesn't plan to circulate Version 1. It would increase the tax by 50 cents on a pack of cigarettes and raise the rate to 45 percent of wholesale price for other tobacco products. It proposes allocating \$15 million annually in the technical institute fund.

The Legislative Research Council finished its review of the two versions June 15. State Attorney General Marty Jackley published his official explanation Aug. 1.

Mickelson wants his proposal to attract enough support to make the general election ballot for November 2018. He needs valid signatures from at least 13,871 registered South Dakota voters by Nov. 6.

If voters approve the tobacco tax increases in 2018, they would take effect on July 1, 2019.

Legislation sponsored by Sen. Jim White, R-Huron, changed the effective date to a uniform July 1 for all constitutional amendments, initiated measures and referendums. State law previously had ballot measures take effect the day after the State Canvassing Board completed its official canvass. Waiting for July 1 adds seven months.

The change also inserts into the waiting period a regular session of the Legislature, which the South

Dakota Constitution says must open in January.

Lawmakers could modify or repeal altogether an initiated law such as the tobacco tax increases before it takes effect.

Mickelson said he chose the ballot measure route because he didn't want to face tobacco lobbyists in the 2018 legislative session. He is House speaker, the chamber's presiding officer, for the 2017-2018 term.

"Found out we were third-highest in the country, double Nebraska, Wyoming and Montana and 40 percent higher than every other state we touch," Mickelson wrote in an email.

He added, "No way to grow a trained workforce."

Tim Dougherty, a lawyer from Sioux Falls, lobbies for Altria, a tobacco company.

"I expect that Altria will join forces with others to oppose Mickelson's tobacco tax initiative," Dougherty said.

Dougherty noted that in 2016 voters in Colorado, North Dakota and Missouri rejected tobacco tax increases on their states' ballots.

Mickelson got his answer regarding South Dakota's need, when the LRC staff released an issue memorandum June 6 analyzing tuition and fees for technical institutes.

South Dakota's tech schools cost about \$6,320 for tuition and fees in 2016-17, according to the study. That was highest of seven states in the region and third-highest in the nation for two-year public institutions.

Legislative Research Council fiscal analysts Jeff Medoff and Stephanie Gruba concluded that South Dakota would have needed about \$19.2 million of additional state support for 2016-17 to reduce its tuition and fees from an average of \$6,320 to \$2,990 and match Nebraska at lowest in the region.

BREAKING NEWS...

World's #2 Smartest Man Reveals Secret "Genius Pill" Supercharge your brain and think better than ever.

BREAKING NEWS: He has one of the highest IQ scores ever recorded.

He beats Einstein and Stephen Hawking in the genius directory.

Yes you have probably never heard of Rick Rosen, officially the world's second smartest man.

Some experts say it's because his intelligence was almost by accident, the result of an unusual "smart pill" he takes every morning.

And he agrees. "This pill makes my brain work better," says Rosen. "By preventing or slowing the brain's inevitable aging process, it's sort of like being smarter."

New Brain-Booster Flying Off Shelves

Dr. Al Sears, M.D., recently released a brain-boosting supplement based on this pill that has become so popular, he's having trouble keeping it in stock.

Dr. Sears is the author of over 500 scientific papers on anti-aging and recently spoke at the WPRF 25 Health & Wellness Festival featuring Dr. Oz and special guest Suzanne Somers. Thousands of people listened to Dr. Sears speak on his anti-aging breakthroughs and attended his book signing at the event.

All told, 27,432 bottles of this pill have been sold — and everyone who takes it reports similar mind-blowing results.

Multiple Studies With Shocking Results

One study found it doubled the memory and cognitive function of 430 patients in just 24 weeks. Another study published in *Neurology* found it not only stopped age-related brain shrinkage in over a thousand seniors, it even boosted brain size, especially in the brain's memory center.

Researchers at a prestigious California university analyzed brain scans from 265 seniors who took this smart pill and compared the group to the placebo and found on average, this made their brains 28 years younger. And that's with just a single weekly dose. Imagine what it could do for you if you took it every day!

One of Dr. Sears' patients from West Palm Beach, Florida, was very concerned when his memory started slipping. "I was worried when I started blanking out on things that used to be routine. All these 'senior moments' started way too young. But they suddenly stopped when I started taking Omega Rejuvenol. Now, I feel my focus and memory are back at age-30 levels."

And then there's Pete, age 69, who had suffered from progressively weaker memory for 11 years. At one point he was unable to remember his locker combination. But within four months of taking this smart pill, he's now a math wizard. In fact, he went back to work as a CPA at a large corporation.

The best part is, the supplement has no adverse side effects, you don't need a prescription or a doctor's visit, and it's 100% natural.

Powerful 'Neotropic' Vital To Brain Health

"Omega Rejuvenol is a true wonder drug for brain health," said Dr. Sears. "This 'neotropic' substantially increases brain volume while supporting mental sharpness and memory."

"The key ingredient of my smart pill is this little-known fatty acid called DHA. Scientists are just beginning to recognize this nutrient as the world's most powerful 'neotropic'."

Your brain is almost entirely made up of fats, 60% of which is DHA. And DHA is essential because it helps your brain grow new branches and renews and rejuvenates itself so you can keep your brain power and sharp thinking.

Top scientists acknowledge we don't get enough DHA in our modern diet. Over the last several decades, our food supply has dramatically changed. DHA is no longer as available as it used to be, not even in fish oil or fish.

The Search For Better DHA
So Dr. Sears went looking for better, more concentrated sources of

Dr. Al Sears with fellow physician Dr. Oz at the WPRF 25 Health & Wellness Festival held recently in Palm Beach Gardens, Florida.

omega-3 DHA. And he found it where nobody else was looking...literally at the bottom of the earth.

Krill are tiny shrimp-like creatures that swim in huge biomasses in the pure, cold waters near the South Pole.

Nature magazine bats them as the basic source of energy for almost all marine life in the world's oceans.

It turns out that DHA found in krill oil is able to penetrate into nearly every cell in your body in a far superior way than fish oil.

In a study published in *Nutrition Research*, krill oil, fish oil and olive oil were compared to see which one raised omega-3 levels higher.

Seventy-six people took 2 grams of krill oil, fish oil or olive oil every day for four weeks — then their omega-3 levels were tested. The results were surprising, to say the least.

Those taking olive oil saw their omega-3s rise 2.9%. Those taking fish oil saw their omega-3s rise 131.8%. But those taking krill oil saw their omega-3s skyrocket 178.4%. That's 38% MORE omega-3s absorbed from krill oil than from fish oil!

Second Source of Rare, Potent DHA

Omega Rejuvenol also includes a second unique source of omega-3. The Argentinian squid thrives by the billions in the icy, pure waters off the tip of South America.

What got Dr. Sears' attention is this mighty mollusk is loaded with DHA. "After this special squid oil is processed, it delivers over 65% DHA — the highest concentration of DHA ever achieved in natural medicinal!" said Dr. Sears.

DHA is a lifesaver because every one of your cells has built-in receptors that absorb it, and every one of your cells craves it. Fueling your body with high levels of DHA can do wonders for your health, and your brain in particular.

With this first-ever combination, you can flood every cell in your brain with the world's most powerful 'neotropic' and get the full range of brain-boosting benefits it has to offer.

Where To Find Omega Rejuvenol

The best way, the only way to get this powerful one-two punch for a sharp memory and brain-boosting benefits is with Dr. Sears' breakthrough Omega Rejuvenol formula.

To secure bottles of this hot, new neotropic, buyers should contact the Sears Health Hotline at 1-888-355-0756 within the next 48 hours. "It takes time to get bottles shipped out to drug stores," said Dr. Sears. "The Hotline allows us to ship the product directly to the customer."

Dr. Sears feels so strongly about this product, he offers a 100% money-back guarantee on every order. "Just send me back the bottle and any unused product within 90 days, and I'll send you your money back," said Dr. Sears.

The Hotline will be taking orders for the next 48 hours. After that, the phone number will be shut down to allow them to restock.

Call 1-888-355-0756 to secure your limited supply of Omega Rejuvenol. You don't need a prescription, and those who call in the first 24 hours qualify for a significant discount. To take advantage of this great offer use Promo Code NPORAUG1 when you call in.

TODAY IN HISTORY

1830: Plans for the city of Chicago were laid out.

1871: The Aberdeen park house lifted the fishing ban at Wylie Park in the hopes of ridding the lake of bullheads.

1977: President Jimmy Carter signed a measure establishing the Department of Energy.

1982: Two fire trucks from

the 1820s were returned to their home in Aberdeen after being loaned to a company in Sioux Falls.

1983: A federal judge sentenced Los Angeles police officers Stacey Koon and Laurence Powell to 2 years in prison for violating Rodney King's civil rights.

2008: President George W. Bush signed legislation allowing the State Department to settle all remaining lawsuits against Libya by American victims of terrorism.
