I met with John Marquardt yesterday afternoon. 90% has been removed. John committed to having the rest removed by the end of the week. I did take pictures yesterday to keep for reference so that I could tell if changed had been made. There is some rotten grain left and the tarping and tubes that were in the bins and that are now laying loose were items they promised to remove this week. They also mentioned that once it is cleared up they would like someone they know who has a law degree but isn't their attorney (?) write up a letter to confirm its been cleaned up. They want me to sign it and they will bring it with them next week to their meeting with the PUC. I spoke with Amanda Reiss this morning regarding that item and the promise John Marquardt made me regarding cleanup of the area.
