COMPLAINT AGAINST TRANSCANADA

SOUTH DAKOTA PUBLIC UTILITIES COMMISSION

On or about July 19, 2007 a landowner in Muster County of South

Dakota, Gary L. Roby, whose address is 23378 434th Ave

Howard, SD SD was contacted by a land agent working for

TransCanada-Keystone Pipeline. The land agent did all of the following checked below;

treated the landowner rudely threatened us with condemnation

told us we would get nothing if we waited and our land was condemned

told us the PUC permit was a done deal and the pipeline was going through

came by without an appointment refused to leave the easement

As the elected officials in South Dakota in charge of the process of review

of the TransCanada permit application, the Public Utilities Commission should take

action to get TransCanada to stop the threats against landowners and taxpayers of

South Dakota. Please consider this a formal complaint. I would like it included in

the formal record. I would like a letter of response back from the PUC and the Attorney

General explaining what action you will take on this matter.
