

While none of us are sure as to where this safe & better route might be it is a real concern of land owners in this area and around.

We do not support the manner in which rights of this land were used. Therefore every means to protect both physically & financially for any kind of damage should first be agreed upon!

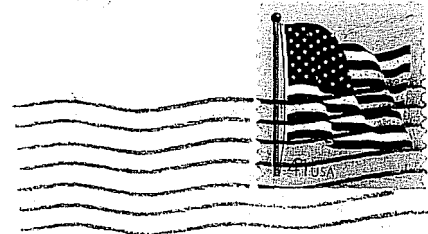

If Trans Canada can't assure these landowners & people of the surrounding areas of that then we definitely have the cart before the horse so to speak.

Acceptance of full responsibility whatever the cost & I don't think there's a problem!
