DATA REQUEST
DATED OCTOBER 30, 2014**

Question 5: Please provide examples of the types of projects the Company expects to be eligible for the commercial custom program.

Response:

The commercial custom program can accommodate a large variety of energy conservation measures (ECM's). Typical projects that we would expect to see are large furnaces and boilers, boiler controls, economizers, heat recovery units, large water heaters (high water use), and building envelope improvements.
