60	395.81	405.24	9.43	2.38%

**Natural Gas Distribution
Rate Increase
Effective July 1, 2016**

On June 30, 2015, Montana-Dakota Utilities Co. (Montana-Dakota) filed an application with the South Dakota Public Utilities Commission (South Dakota PUC) for authority to increase its rates for natural gas service in South Dakota by \$1.53 million or 3.1 percent. Montana-Dakota's last natural gas rate increase in South Dakota was in 2013 and resulted in an approximate 2 percent increase to customers. The primary reasons for this rate application is an increase in operating costs, along with increased investment in the natural gas system servicing South Dakota customers.

On _____, the South Dakota PUC authorized an increase in revenues of \$1.2 million or approximately 2.45 percent annually to be effective July 1, 2016. The actual impact to customers' bills as a result of this rate increase will vary depending on the customer's rate class and amount of natural gas used. A typical residential customer using 72 dk on an annual basis will see an average increase of approximately \$1.49 per month.

As allowed by South Dakota Codified Law 49-34A-17, Montana-Dakota implemented Interim Rates effective January 1, 2016 as a percentage of bill based on the total revenues collected. As the final revenue

increase authorized was less than the interim rate increase implemented January 1, 2016, Montana-Dakota will refund the difference with interest to customers no later than October 1, 2016. A residential customer using 72 dk on an annual basis will see an interim rate refund of approximately \$_____.

The rates for various classes of service are shown below. The Cost of Gas is strictly a pass-through cost to the Company's customers and is subject to change on a monthly basis as outlined in the Company's Rate 88 tariff. The Cost of Gas shown in the rates below reflects the Cost of Gas effective June 1 and July 1, 2016, respectively. A comparison of the residential rates at various consumption levels is also provided below.
