South Dakota First Data Requests NG16-011

1-5. Is MidAmerican responsible for inspecting valves, separators, meters and telemetric equipment, quality measurement, odorant and other equipment necessary to regulate and deliver gas at the interconnection point?

Response:

MidAmerican will be responsible for inspecting all equipment with the exception of the quality monitoring equipment. The quality monitoring equipment will be the responsibility of the Customer. The Customer will provide calibration reports to MidAmerican on an annual basis.
