RATE DESIGNATION: Customer Balancing	

(Con't.)

- (c) Long Critical Day – The Customer is permitted to incur a Daily Positive Imbalance up to and including five percent (5%) and is permitted to incur an unlimited Negative Imbalance.

- (d) Operational Flow Order (OFO) – Company may call an OFO on a specific customer, multiple customers, or a Group Customer in order to limit critical day parameters to as small a segment of customers as possible. This customer or group will be subject to the same balancing parameters imposed on a Critical Day as outlined above.

CLASS OF SERVICE: Gas Transportation Tariffs **Rate No. 87**
RATE DESIGNATION: Customer Balancing

(Cont.)

- (c) Revenue Sharing – Over/Under Delivery Charges for Imbalances shall be credited to the sales customers via the Purchased Gas Cost Adjustment filing.

- (d) Waiver of Penalties – Regardless of Customer circumstances, the Company will not waive interstate pipeline imbalance charges that are incurred due to a customer imbalance. However, in the event of unanticipated, non-recurring conditions experienced by the Customer with their natural gas fueled equipment where the Customer as a result of problems with its natural gas fueled equipment was unable to use all quantities of gas confirmed for delivery (excluding changes in production levels by the Customer), or other extraneous circumstances beyond the customer’s control, the Company may, at its discretion, waive its daily imbalance charges for the gas day the condition initially occurred, if the imbalance results in no detriment to other NorthWestern customers. Any imbalance charge paid by the Customer or waived by the Company shall not be construed as giving the Customer the right to continue to create an imbalance on the system.

4. Optional Daily Balancing Service (DBS):

- (a) Description - A Customer or Group Customer shall have the option to choose a Daily Balancing Service ("DBS"). This balancing service is available on critical days. The balancing service available on critical days will be limited by the percentage available on the applicable interstate pipeline, as published on the pipeline’s bulletin board notice. The percentage available will mirror the applicable interstate pipeline’s percentage per the pipeline bulletin board notice. This is a delivery point service providing balancing tolerance, on a reasonable efforts basis, above or below the Customer's Receipts without the incurrance of Daily Over/Under Delivery Charges. This service is available on a monthly basis. The Customer must notify the Company of its DBS quantity coincident with reporting gas nominations for the first day of the month. If a Customer also elects to enter a Group Balancing arrangement, the Customer's DBS quantity becomes available for use by the Group Customer. DBS does not affect the monthly Cash-Out of Imbalances.
