## Resumes of Key Personnel

### R. Daniel (Smokey) Hyde, Jr., Chairman of the Board

R. Daniel Hyde, Jr. is a native of El Paso, Texas and a graduate of Texas A&M University. He became a resident of Louisiana in December of 1971 when he purchased KRMD AM/FM Radio in Shreveport. He operated these stations for 15 years and developed the No. 1 billing and No. 1 rated radio stations in the area for 15 years. When the stations were sold in 1985, it was the largest radio transaction in the history of the state at \$5.5 million dollars. Hyde divested himself of radio stations in Flagstaff, Arizona, Reno, Nevada, and Shreveport, Louisiana and entered the paging business in 1988. He started with zero subscribers and in 10 years developed a subscriber base of 40,000. The company grew to a total of nine retail outlets where prepaid paging, prepaid cellular, prepaid home phone, and prepaid long distance were marketed. The system grew from three towers and transmitters to 26 towers and transmitters, serving all of Louisiana north of Opelousas with statewide coverage. The paging company was sold on May 1, 1998 and Mr. Hyde now devotes full time effort to Budget Phone, Inc. and Snappy Phone of Texas, Inc.

### Jerry W. Black, President

Jerry W. Black is a native of El Paso, Texas and attended Tarleton State University in Stephenville, Texas. He became a resident of Louisiana in December 1971 when he and Mr. Hyde purchased KRMD Radio in Shreveport. As a partner in this company, his primary job was General Sales Manager. This included the supervision of five sales representatives, the tracking of all commercials, and the production of those commercials in addition to overseeing the day-to-day operations of the station. After the station was sold in 1985, Mr. Black was offered and accepted a position with the CBS television affiliate in Shreveport to manage their sales department. He remained there for five years. In 1991, he moved to an independent cable-advertising firm, J.B. CableAds where he became familiar with a subscriber-based industry. He served as president and responsibilities included the supervision of all sales and production of the commercials. J.B. CableAds operated in North Carolina, South Carolina, Indiana, Kansas, Arkansas, and Louisiana. From 1997 to 2001, he owned a successful prepaid cellular phone, paging, and home phone-based business in Marshall, Texas. At the same time, Mr. Black was the retail manager for two successful retail stores that sold telecommunication products and services in Longview and Tyler, Texas for Budget Phone, Inc.

Tony M. Cason, Operations Manager

Tony M. Cason has extensive expertise in telecommunications, system design, and a managerial background. In 1989, Mr. Cason entered in to the cellular wireless industry where he owned and operated a successful cellular retail store. Within eight years, Mr. Cason's subscriber base had grown to over 10,000. In November 1996, Mr. Cason joined Budget Phone Inc. as Operations Manager where he designed, organized, staffed, and successfully developed a prepaid cellular switching system in East and Central Texas and in South Louisiana.

405 N. Jodie St.  
Shreveport, LA 71107

I have 34 years experience in the computer industry. I have a major in Computer Science from Louisiana State University and Vendors schools ranging from IBM 360 Computer mainframe, to Seimens Four Wire Telephone Switching center. Novel and Windows NT training are the most recent schools I have attended.

I have installed a frame relay circuit from Snappy Phone's headquarters in Shreveport, to Ameritech's main computer center in Chicago for the sole purpose of LEX access. I have also installed a frame relay circuit to Southwestern Bell's Computer center in Dallas to access Lex and Toolbar applications from SBC. Both of these circuits flow through one of our Cisco Routers into a single cloud for final routing to the Ameritech and SBC destinations. A similar circuit handles communications with Bell South.

I have been instrumental in the design and implementation of an automated system for processing telephone applications electronically using interconnected computers with Bell South, Verizon, Sprint, Southwestern Bell and Ameritech. Present capacity of the system is sufficient to handle upwards of 200,000 subscribers. The system consists of 150 workstations and 10 servers.

SECTION 3 - DESCRIPTION OF SERVICE

3.1 Computation of Charges

3.1.1 The total charge for each completed call may be a variable measured charge dependent on the duration, distance and time of day of the call. The total charge for each completed call may also be dependent only on the duration of the call, i.e. a statewide flat rate per minute charge. The variable measured charge is specified as a rate per minute which is applied to each minute. All calls are measured in increments as set forth in the Rates Section of this tariff. Fractions of a billing increment are rounded up to a full billing increment on a per call basis. Fractions of a cent per minute are rounded up to a full cent on a per call basis.

3.1.2 Where mileage bands appear in a rate table, rates for all calls are based upon the airline distance between the originating and terminating points of the call, as determined by the vertical and horizontal coordinates associated with the exchange (the area code and three digit central office code) associated with the originating and terminating telephone numbers. If the Customer obtains access to the Company's network by a dedicated access circuit, that circuit will be assigned an exchange for rating purposes based upon the Customer's main telephone number at the location where the dedicated access circuit terminates. The vertical and horizontal (V & H) coordinates for each exchange and the airline distance between them will be determined according to industry standards.

Recognition of answer supervision is the responsibility of the Underlying Carrier. Timing for each call ends when either party hangs up. The Company will not bill for uncompleted calls.

**3.2 Customer Complaints and/or Billing Disputes**

Customer inquiries or complaints regarding service or accounting may be made in writing or by telephone to the Company at:

6901 W. 70th Street

5.2 Call Timing for Usage Sensitive Services

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- 5.2.1 Calls are measured in durational increments identified for each service. All calls, which are fractions of a measurement increment, are rounded-up to the next whole unit.
- 5.2.2 Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s).
- 5.2.3 Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.
- 5.2.4 Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call.
- 5.2.5 All times refer to local time.

5.3 Distance Calculations

Where charges for a service are specified based upon distance, the following rules apply:

5.3.1 Distance between two points is measured as airline distance between the rate centers of the originating and terminating telephone lines. The rate center is a set of geographic coordinates, as referenced in Local Exchange Routing Guide issued by Bellcore, associated with each NPA-NXX combination (where NPA is the area code and NXX is the first three digits of a seven-digit telephone number). Where there is not telephone number associated with an access line on the Company's network (such as a dedicated 800 or WATS access line), the Company will apply the rate center of the Customer's main billing telephone number.

5.3.2 The airline distance between any two rate centers is determined as follows:

Step 1: Obtain the "V" (vertical) and "H" (horizontal) coordinates for each Rate Center from the above-referenced Bellcore document.

Step 2: Computer the difference between he "V" coordinate of the two rate centers; and the difference between the two "H" coordinates.

Step 3: Square each difference obtained in step (b) above.

Step 4: Add the square of the "V" difference and the square of the "H" difference obtained in step C) above.

Step 5: Divide the sum of the squares by 10. Round to the next higher whole number if any fraction is obtained.

Step 6: Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.

5.3.3 The formula for distance calculations is:

$$(V_1 - V_2)^2 + (H_1 - H_2)^2 \qquad 10$$

SECTION 11.0 - MISCELLANEOUS SERVICES

**11.1 Carrier Presubscription**

**11.1.1 General**

Carrier Presubscription is a procedure whereby a Customer designates to the Company the carrier which the Customer wishes to be the carrier of choice for intraLATA and interLATA toll calls, Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. Presubscription does not prevent a Customer who has presubscribed to an IntraLATA or InterLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative long distance carrier on a per call basis.

**11.1.2 Presubscription Options** - Customers may select the same carrier or separate carriers for intraLATA and interLATA long distance. The following options for long distance Presubscription are available:

- Option A:** Customer select the Company as the presubscribed carrier for IntraLATA and InterLATA toll calls subject to presubscription.
- Option B:** Customer may select the Company as the presubscribed carrier for IntraLATA calls subject to presubscription and some other carrier as the presubscribed carrier for interLATA toll calls subject to presubscription.
- Option C:** Customer may select a carrier other than the Company for intraLATA toll calls subject to presubscription and the Company for interLATA toll calls subject to presubscription.
- Option D:** Customer may select the carrier other than the Company for both intraLATA and interLATA toll calls subject to presubscription.
- Option E:** Customer may select two different carriers, neither being the Company for intraLATA and interLATA toll calls. One carrier to be the Customers' primary intraLATA interexchange carrier. The other carrier to be the Customer's primary interLATA interexchange carrier.
- Option F:** Customer may select a carrier other than the Company for no presubscribed carrier for intraLATA toll calls subject to presubscription which will require the Customer to dial a carrier access code to route all intraLATA toll calls to the carrier of choice for each call.
