Subject: TC11-090 Data Request #2 and #3

Carey:

From the message you left on my phone some time back, it appears you have answers to the questions I sent you on December 21, 2011. If I understood your answers correctly, they may satisfy the Commission's need to understand the situation. We need to have you file your answers into the docket so we can move forward with this proceeding. You may wish to answer in the form of a letter to the Commission explaining the historic background of the questions I posed instead of the more traditional line item response such as that filed in the first data response. Either is acceptable to Staff as long as your answer addresses all of staff's questions.

Also, it is noted that the financials provided include one or more subsidiaries of the applicant. Please reconcile this with the information provided on page 2, item 5, of the application which states "WCS does not have any affiliates, subsidiaries or parent organizations." Please efile this response into the docket also.

Also, please have the applicant submit a \$25,000 bond using the template attached.

If you have any questions, please reply or contact me at 605-773-3201.
