

Docket Number: TC 12-111

Subject: Response to South Dakota Data Request No. 1

Request to: Neutral Tandem - South Dakota, LLC

Request From: South Dakota Public Utilities Commission Staff

Request Date: January 14, 2013

Response Date: February 11, 2013

1. Please provide a detailed work paper showing the calculation of Neutral Tandem's proposed transitional intrastate terminating Carrier Common Line rate.

Neutral Tandem initially filed its intrastate reduction based on the reduction filed by the Incumbent LEC. When SD Staff questioned the basis of the filing, Neutral Tandem reviewed the rate change in light of its 2011 demand and realized that its initial reduction did not meet the requirements of the FCC Order. The attached demand analysis demonstrates that the revised filing effects the required reduction.

2. Please provide the federally filed interstate tariff sheet(s) which contain or support the calculation requested in #1 above.

Please see attached.

3. Please provide a worksheet that clearly shows:

- a. Neutral Tandem's annual terminating intrastate access revenues utilizing its intrastate minutes of use during the period of October 2010 through September 2011, and utilizing Neutral Tandem's intrastate rates in effect at December 29, 2011.
- b. The same revenue determination as above except utilizing Neutral Tandem's interstate access rates.
- c. The same revenue determination as above except utilizing Neutral Tandem's proposed intrastate access rates.

Please see the response to Question #1.

4. Please submit a request for waiver of the specific provision in rules ARSD 20:10:29:10, 20:10:29:12, and 20:10:29:16 that specify "the per minute charge is equal for both originating and terminating traffic."

Please see attached.
