3.3 VOICE OVER INTERNET PROTOCOL – PUBLIC SWITCHED TELEPHONE NETWORK (“VoIP-PSTN”) TRAFFIC

3.3.1. Identification and Treatment of VoIP-PSTN Traffic

A. Company is entitled to compensation on traffic exchanged with Customers when such traffic originates and/or terminates in Internet Protocol format, as set forth in Section 51.913 of the Federal Communications Commission’s rules, 47 C.F.R. §51.913, regardless of whether the Company itself delivers such traffic to the called party’s premises or delivers the call to the called party’s premises via contractual or other arrangements with an affiliated or unaffiliated provider of interconnected Voice over Internet Protocol service.

B. Intrastate VoIP – PSTN traffic is subject to the following rates:

1. Originating Access

a. Until the effective date of Rule 51.913, (a)(2) amended by the Federal Communications Commission’s *Second Order on Reconsideration* in WC Docket No. 10-90 *et al.* (April 25, 2012): the originating rates set forth in the Company’s interstate tariff, F.C.C. Tariff No. 1:

b. Upon the effective date of Rule 51.913, (a)(2) amended by the Federal Communications Commission’s *Second Order on Reconsideration* in WC Docket No. 10-90 *et al.* (April 25, 2012): the originating rates set forth in this Tariff.

3.3.1. Identification and Treatment of VoIP-PSTN Traffic, Continued

B. Calculations and Application of Percent-VoIP-PSTN Usage

Company will determine the number of Relevant VoIP-PSTN Traffic minutes of use (“MOU”) to which interstate rates will be applied under subsection 3.3.1.A, above, by applying a Percent VoIP Usage (“PVU”) factor to the total intrastate access MOU exchanged between a Company End User and the Customer. The PVU will be derived and applied as follows.

1. The Customer will calculate and furnish to Company a factor (the “PVU-A”) representing the percentage of the total intrastate and interstate access MOU that the Customer exchanges with Company in the State, that (a) is sent to Company and that originated in IP format; or (b) is received from Company and terminated in IP format. This PVU-A shall be based on information such as the number of the Customer’s retail VoIP subscriptions in the state (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information.
2. Company will similarly calculate a factor (the “PVU-B”) representing the percentage of Company’s total intrastate and interstate access MOU in the State that Company originates or terminates on its network in IP format. This PVU-B shall be based on information such as the number of Company’s retail VoIP subscriptions in the state (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information.

SERVICE DESCRIPTIONS, Continued**3.3 VOICE OVER INTERNET PROTOCOL – PUBLIC SWITCHED TELEPHONE NETWORK (“VoIP-PSTN”) TRAFFIC, Continued****3.3.1. Identification and Treatment of VoIP-PSTN Traffic, Continued****B. Calculations and Application of Percent-VoIP-PSTN Usage**

3. Company will use the PVU-A and PVU-B factors to calculate a PVU factor that represents the percentage of total intrastate and interstate access MOU exchanged between a Company End User and the Customer that is originated or terminated in IP format, whether at Company’s end, at the Customer’s end, or at both ends. The PVU factor will be calculated as the sum of: (A) the PVU-A factor and (B) the PVU-B factor times (1.0 minus the PVU-A factor).

4. Company will apply the PVU factor to the total intrastate access MOU exchanged with the Customer to determine the number of Relevant VoIP-PSTN Traffic MOUs.

Example 1: The PVU-B is 10% and the PVU-A is 40%. The PVU factor is equal to $40\% + (10\% \times 60\%) = 46\%$. Company will bill 46% of the Customer’s intrastate access MOU at its applicable tariffed interstate rates.

Example 2: The PVU-B is 10% and the PVU-A is 0%. The PVU factor is $0\% + (100\% \times 10\%) = 10\%$. Company will bill 10% of the Customer’s intrastate access MOU at Company’s applicable tariffed interstate switched access rates.

Example 3: The PVU-A is 100%. No matter what the PVU-B factor is, the PVU is 100%. Company will bill 100% of the Customer’s intrastate access MOU at Company’s applicable tariffed interstate switched access rates.

5. If the Customer does not furnish Company with a PVU factor, the Company will utilize a PVU-A factor of zero.

(N)

(N)

SERVICE DESCRIPTIONS, Continued**3.3 VOICE OVER INTERNET PROTOCOL – PUBLIC SWITCHED TELEPHONE NETWORK (“VoIP-PSTN”) TRAFFIC, Continued****3.3.2. Initial PVU-A Factor.**

If the PVU-A factor is not available and/or cannot be implemented in Company’s billing systems, the Company will adjust the Customer’s initial PVU-A to zero retroactively to January 1, 2012.

3.3.3. PVU Factor Updates

The Customer may provide a traffic study or similar analysis that is acceptable to the Company to update the PVU factors quarterly. The Customer shall submit such updates no later than the 15th day of January, April, July and October of each year. Revised PVU factors must be based on data for the prior three months ending the last day of December, March, June and September respectively. The revised PVU factors will be used for future billing and will be effective on the due date of each month and will be used for subsequent monthly billing until superseded by a new PVU factor. No prorating or back billing will be done based on the updated PVU factors except as provided in Section 3.3.4., below.

3.3.4. PVU Factor Audit and Verification

- A. The Company and Customer may request no more than four audits in any twelve-month period with respect to the PVU factors including, but not limited, the veracity of the underlying data or the calculation of a PVU. Each party shall bear its own costs associated with any audit or verification of the PVU factor.
- B. If the audit results in a revised PVU, the Company and Customer will true-up their billings under the revised PVU.
