

4-1) In determining the proper intrastate PVU, why does the company use both intrastate and interstate access MOUs?

Answer:

The Company uses both interstate and intrastate MOU to calculate its Percent VOIP Usage (PVU) factors because: (a) the combined MOU best reflects the actual PVU that the Company experiences; and (b) the rates for terminating VOIP-PSTN traffic for intrastate and intrastate usage will equalize on July 1, 2014.
