SWITCHED ACCESS SERVICES

SECTION 3 – OBLIGATIONS OF THE CUSTOMER (CONT'D)

3.4.6 Identification and Rating of VoIP-PSTN Traffic [N]

This section governs the rating and identification of VoIP-PSTN Traffic. In accordance with the Federal Communications Commission's Report and Order released November 18, 2011 (FCC 11-161) and Second Order on Reconsideration released April 25, 2012 (FCC 12-47), both in WC Docket No. 10-90, et all. (together, the "FCC Orders"): (1) intrastate VoIP PSTN Traffic that originates on the Company's network and is bound for the Customer's end users is subject to the intrastate switched access rates set forth in this tariff until June 30, 2014, after which time it will be subject to interstate rates contained in the Company's Tariff F.C.C. No. 4 and in Section 15 herein; and (2) intrastate VoIP PSTN Traffic that is sent by the Customer for termination to Company end users is subject to interstate switched access rates set forth in the Company's Tariff F.C.C. No. 4 and in Section 15 herein.

The remainder of this section establishes the method of separating VoIP-PSTN Traffic from the Customer's traditional intrastate access traffic, so that VoIP-PSTN Traffic can be billed in accordance with the FCC Orders.

Calculation and Application of Percent-VoIP- Usage Factors

The Company will determine the number of VoIP-PSTN Traffic minutes of use (MOU) to which interstate rates will be applied by applying a Percent VoIP Usage (PVU) factor to the total terminating intrastate access MOU sent to a Company end user by the Customer. Beginning July 1, 2014, the Company will apply the PVU not just to terminating access MOU but to the total intrastate access MOU exchanged between the Company and the Customer. The PVU will be derived and applied as follows:

- a. The Customer will calculate and furnish to the Company a factor (PVU-A) representing the whole number percentage of the total intrastate access MOU that the Customer exchanges with the Company in the State that is sent to the Company that originated in IP format. Beginning July 1, 2014, the Customer's PVU-A shall be based on access MOU the Customer exchanges with the Company in the State that is (i) sent to the Company that originated in IP format or (ii) is received from the Company and terminated in IP format.
- b. The Company will calculate a factor (PVU-B) representing the whole number percentage of the Company's total intrastate access MOU in the State that terminates in IP format. Beginning July 1, 2014, the PVU-B shall be based on access MOU in the State that originates or terminates in IP format.
- c. The Company will use the PVU-A and PVU-B factors to calculate a PVU factor that represents the percentage of total terminating intrastate access MOU received from the Customer that is terminated in IP format by the Company and/or originated in IP format by the Customer. Beginning July 1, 2014, the PVU factor will represent the total access MOU exchanged between the Company and a Customer that is originated or terminated in IP format at either the Company end or Customer end. The PVU will be the sum of (i) the PVU-A factor and (ii) the PVU-B factor times (1 minus the PVU-A factor). The Company will apply the PVU factor to the total intrastate access MOU exchanged with the Customer to determine the number of VoIP-PSTN Traffic MOUs.
