

Mapping of MCImetro Rates to Qwest Rate Structure:

MCImetro Rate Element	Qwest Rate Components
Direct Connect	equals Carrier Common Line plus Local Switching LS2 plus E.O. Shared Port plus Interconnection Charge
Tandem Connect w/out Switching	equals Direct Connect plus Tandem Transmission (15 miles) plus Common Transport Multiplexing
Tandem Connect with Switching	equals Tandem Connect w/out Switching plus Tandem Switching (see note)

Note: MCImetro applies the Tandem Connect with Switching rate element **only** on certain UNE-P-type traffic that is switched through the Qwest tandem. MCImetro does not apply that rate element to any traffic switched through its own network facilities.
