I can just have it filed without the confidential paper filed and I can have the other 2 documents, the excel file and the cover letter, filed as public.

Eric

That is fine. Do you want us to re-file?

Jason,

After talking it over some more here with other staff, will it be ok if I have this filing put in as public and not confidential? We think that since the PAP states it should be put in the public file we probably should have it filed non-confidentially if that's ok with you?

Thanks,
Eric

We will do so. Sorry for the mix up.

Thanks Jason.

I had read those sections as being monthly reports and not an aggregate report as well. But now that I read 12.2 again I do see that an aggregate report of all monthly reports is stated. I think since the confidential request was filed this time we can just have this one be confidential, unless you want to resubmit but I don't think that's necessary right now. The reports filed in the future, if they aren't confidential, then you can just submit them without the request for confidential treatment.

Thanks,
Eric

Eric:

This is a filing pursuant to sections 12.1 and 12.2 of the PAP. We should have filed the aggregate data as non-confidential and will do so in future months. We could re-file this one as well if you would so prefer.

Hi Dianne,

We received your filing and I have one quick question. It has been a while since I have reviewed the PAP and I just skimmed through it quick again. My question is, is this being submitted per the last section of 2.1? I see there is payment eligible records in the excel file so I believe I may be wrong.

2.1 The PAP is a remedy payment and performance-monitoring plan. CenturyLink QC shall be subject to self-executing payments to CLEC for submeasurements, that are designated as "payment eligible" in Section 3.0 and that have parity or benchmark standards, as identified in Interconnection Agreement Exhibit B (Performance Indicator Definitions or "PIDs"), which generate payments (described in Sections 7.0 and 8.0). For measurements and submeasurements (PIDs) that are designated as "diagnostic" in Section 3.0, CenturyLink QC will report their performance results for monitoring purposes.

If not could you point me to why this was submitted? I'm just curious so that I can figure out how I need to have the information stored.

Thanks for the help,
Eric
