

Farmers Mutual Telephone Company

TC13-064

Data Request No. 1

- 1-1 See the attached spreadsheet. As you can see, I tried to calculate total access lines, but came up with three different results. I was expecting total access lines to be roughly the same for all categories. I also tried to calculate the South Dakota percentage of total USF receipts, and again came up with three different results. I was also expecting the percentage to be roughly the same for all categories. It would be helpful if you could explain how the South Dakota portion was calculated for Exhibit A.
- 1-2 Please submit a revised Lifeline Report front page with the line checked for “Letter to existing and new customers.” Also submit a copy of the letter(s).
- 1-3 Please submit your broadband plan.
