In accordance with provisions in the FCC’s USF and ICC Transformation Order, paragraphs 636 and 637, and 47 CFR 54.313(a)(9), at the meetings with the Tribal Authorities, the Company will, with tribal input, develop a needs assessment to assist with future service deployments on Tribal lands. In particular, the Company and the Tribal Authority discussions relating to needs and service deployment will be focused on community anchor institutions. The feasibility and sustainability of communications services on tribal lands will be discussed and the Company will, with assistance from the Tribal Authorities, attempt to identify additional steps that can be taken to make essential communications services deployed on Tribal lands both feasible and sustainable. The Company and Tribal Authorities will also discuss and explore ways in which they can coordinate or partner to ensure that services are marketed on tribal lands in a manner that will relate to the community and resonate with consumers, with the aim of increasing service adoption. At such meetings, the Company will also be prepared to discuss the relevant rights-of-way and other permitting and review processes, as well as any challenges associated with these processes. And finally, the Company will come to any such meetings prepared to discuss and engage the Tribal Authorities on any relevant and applicable Tribal business and licensing requirements.
