

**City of Brookings Municipal Telephone
Docket TC13-102 ETC Certification
Data Request No. 2**

- 2-1 With an e-mail dated Wednesday, October 23, 2013, SDPUC Staff issued a Data Request No. 2 to City of Brookings Municipal Telephone with question 2-1, which states "Please provide your broadband plan".

In response, The Public Notice (DA 13-1707) released by the FCC on August 6, 2013 setting the filing deadline for the Form 481 specifies only service associated with "voice telephony service" in calendar year 2012 should be filed. USAC training confirmed that Lines 320, 330, 440, 450, 700, 710 and 1000 were not to be completed for FCC Form 481 reporting due October 15, 2013. City of Brookings Municipal Telephone has not yet developed a "broadband plan" specifically for purposes of FCC compliance, because such plan is not yet required by the FCC, for the current/relevant reporting period.

With the above understanding, City of Brookings Municipal Telephone continues to expand and improve broadband capabilities and services for its customers. City of Brookings Municipal Telephone has installed fiber optic facilities to every residential and business structure within its service territory. With fiber optic connectivity available to each structure within City of Brookings Municipal Telephone service territory, increasing data speeds with continually improving reliability and robustness are available to customers. Currently, customers can select from general availability packages as high as 50Mbps or they can select custom arrangements up to 1 Gbps. City of Brookings Municipal Telephone fiber optic infrastructure enables the broadband service offerings to grow and keep pace with consumer demands.
