1 CHAIRMAN HANSON: EL13-004. If I happen to skip 2 one of these as I'm going through -- I have a lot of 3 papers here, and if I miss one, please bring it to my attention. 4 5 I believe we are at Docket EL13-004, In the 6 matter of the request for a declaratory ruling regarding 7 the electric service territory boundary between 8 Charles Mix Electric Association, Incorporated and 9 NorthWestern Corporation doing business as NorthWestern 10 Energy. 11 The question before the Commission is today how shall the Commission rule on the location of the electric 12 13 service territory boundary shared by CME and NorthWestern 14 for its subject location? 15 I believe it is NorthWestern -- the filing was 16 from Charles Mix Electric Association. 17 MR. SMITH: I notice, Mr. Chairman, that Mike is 18 out of the room right now for a minute. 19 Is he going to be just a minute? 20 MS. NILSON: I sure hope so or he's going to 21 have to pay me a whole lot more. 22 MR. SMITH: Should we maybe take a five-minute 23 break? 24 All right. CHAIRMAN HANSON: 25 MS. NILSON: That will be great. It's going to

1 take me 2 minutes to set up. CHAIRMAN HANSON: We're going to go on a 2 10-minute recess here. We'll start at 11:30. 3 4 (A short recess is taken) 5 CHAIRMAN HANSON: We are back on the web, and we 6 are back in order here. We have read Docket EL13-004, 7 and we are turning to testimony from Charles Mix Electric 8 Association. 9 Good morning. 10 MR. WHALEN: Good morning, Commissioners. Μv name is Michael Whalen. I'm an attorney out of 11 Rapid City. I represent Charles Mix Electric. Assisting 12 13 me today is my secretary, Kassie Nilson, and also 14 available for the Commission's questions our general 15 manager, Mark Mengenhauser, from Charles Mix Electric. 16 And I think most people know him. 17 I'd like to begin by establishing I guess that 18 at the heart of the dispute begins with a discussion 19 about southwest Platte, in particular Sunset Acres 20 Development. 21 Kassie, please bring up that. That would be 22 Exhibit No. 6, I believe. 23 I have prepared compendium of the exhibits for 24 the Commissioners, their attorney, and Mr. Tysdal, and I 25 have also provided one to opposing counsel.

What's being displayed here, hearing Exhibit
No. 6, is Sunset Acres. And as you can see from what's
being shown there, it is located southwest of Platte.
Recently Platte annexed that southwest portion and
included this particular subdivision or development
within its territory.

If you look closely, you'll see that there is room for 11 homes. And this brought the issue to a head. In that regard, there was some five years ago the home of Chad Johnson, which was built there in the northwest corner of that subdivision. It was unnoticed by my client for a period of five years.

However, once the additional homes starting in 2012 there was three homes built. There is currently one under construction. So there would be a total of five homes for the purposes of our visiting today. The potential once again is for 11.

This might be the focus and the heart of this discussion and this matter, but it actually includes more acres than what's represented here, which is probably 12 to 14 acres with respect to that subdivision.

In order that we have a proper background, I guess, to consider this matter, I'd like to display for the Commission Exhibit No. 1, and I believe it is page 4. Exhibit No. 1 is the Petition that we originally

filed. I'd like to direct your attention to the fact that this is -- this particular exhibit came from the archives, that is the vault, at the cooperative headquarters in Lake Andes. And it represents our copy going back to 1975, and the agreement is shown there and being displayed in the upper right-hand corner of that page of that exhibit.

8 You can see that it's dated December 22, 1975. 9 It's executed by the appropriate representatives of 10 both NorthWestern Public Service Company, which was the 11 predecessor for NorthWestern Energy, and by the manager, 12 Ed Ayers), of Charles Mix Electric back on that date.

The reason that I'm bringing this up is what we're going to discover is this map which constitutes the agreement, the heart of the agreement, is a little bit different than the map that appears online and somewhat different from the original map that Mr. Tysdal has in his possession over there.

19 Kassie, please go to the next page of that 20 exhibit, and I believe it's Exhibit No. 2.

21 What you'll see depicted there is the western 22 part of Charles Mix County. And, Kassie, I'd like to 23 please call out the area around Platte. I hope you can 24 see that.

25

And I'm going to strain your eyes for a moment.

1 Because what's apparent from our original, from our archives, is that the map does not reflect what is 2 3 currently online and for the Commission's online map. Nor does it reflect what is, in fact, being offered by 4 5 NorthWestern here as their map. 6 And here's where I'm going to strain your eyes. 7 I want you to call out that portion of the southwest part 8 of Platte, please, Kassie. 9 Now it's difficult to see, but under the 10 coloring, particularly in the corners, you'll see right 11 angles. You'll also see what looks to be a cross hair 12 located there and there, and the record should reflect 13 I'm indicating on the monitor (indicating). 14 If you look very carefully, you'll see those. 15 But those corners, those right angles, are, in fact, 16 corners for 40-acre tracts. In other words, what 17 would -- the engineers or surveyors would call 16th 18 lines. Not 1/64th lines, but 16th lines. 19 Okay. You want to pull that back. 20 So what the point of this is, is that, in fact, 21 if we go back to the original documents, what we'll 22 discover is the boundaries are not what has been 2.3 suggested by NorthWestern Energy at this time. And I'm 24 going to show that clearer as we move through this 25 presentation.

Kassie, would you please bring up -- let's go to
 hearing Exhibit No. 4.

Now this is taken -- the one on the right on this exhibit is offered by NorthWestern. And the one on the left is from our archives. And what I want to point out to you is that -- and I'm sure you're all familiar with dividing the section into quarter sections and then into quarter quarter sections.

9 And in that regard, what we've gotten over the 10 course of the years is what I would call territory creep 11 or encroachment. There was a full 40 acres under each 12 side of the section line. There's a full 40 acres as 13 depicted in the original archived map.

And when we look at those two and compare it to what's been offered by NorthWestern -- and I have that in here as well. Let me see where it is.

I think if you would please go to -- I think it's hearing Exhibit No. 9. And go to the third page. Maybe the fourth page. Okay. Set that over on the left-hand side, if you would, please, and then I want you to call up another one for comparison sake, from the Affidavit of Michael Sydow, and that would be hearing Exhibit 11, page 3.

24 What I want to direct your attention to is not 25 only to creep to the west on the west side here, compare

that, please, to what appears on the so-called official PUC map. And then also notice the difference from the section line north to the boundary on what NorthWestern has offered versus the quarter mile that's depicted on the official map.

6 So what we've got and what we're contending here 7 and what I'm representing to you is that there is an 8 extra 40 acres on the west side of the NorthWestern map, 9 an additional 40 acres on the south side, and then we'd 10 have to consider the quarter. All total we've got 11 90 acres of creep.

That's not what Charles Mix Electric agreed to 12 13 when we filed when the agreement was made in 1975. The 14 agreement was fairly clear to the extent that before 15 someone got in there with their crayon and decided to 16 color outside the line. And if you look very carefully 17 at our map, the one that we have from that period of 18 time, we discovered that there's an overreaching to the 19 extent of 90 acres. That 90 acres includes Sunset Acres, 20 and that's an important subdivision or development to 21 Charles Mix Electric.

I also want to direct your attention to something here, keeping in mind what you've already seen.

25

And, Kassie, if you'd please go to trial

4	
1	exhibit I'm sorry. Hearing Exhibit No. 7.
2	This represents, and I'll show you in a moment
3	when you call out the lower right-hand portion no, no.
4	The lower right-hand portion, that identifies the
5	original and date of this particular map.
6	I don't know if you can see it, but you can on
7	the packet I put in front of you. This is from
8	NorthWestern Public Service Company. This map is dated
9	May of 1979.
10	Now it was revised 19 years later, and we're
11	going to show you the 1998 map as well. If you could go
12	back to the main map and call out the southwest portion
13	of Platte, please.
14	This is NorthWestern Energy's own map. You can
15	see from what's being displayed that this is the boundary
16	as they in their internal documents established and used
17	for two decades.
18	Consequently there's, as I indicated before
19	you know, I want you to color that in Kassie, two
20	different colors, and show where the 40 acres is north of
21	the section line.
22	The thing about this Trial Director program is
23	that it can only use straight lines, which is kind of
24	nice because what we're showing you here is two squares.
25	Not rectangles laid on their sides, but two squares of

1 40 acres each. That's what NorthWestern said it was for 2 two decades. 3 Now let's take and compare that to that -- and I 4 also want to note on the left-hand side, that is the west 5 side, that there is -- each one of these would be a 6 quarter of a mile. This -- what I'm indicating on the 7 map, this would be a quarter of a mile, 1,320 feet. 8 Likewise, 1,320 feet plus another 1,320 feet for a total 9 of a half-mile. 10 It's our contention that all along in 11 Charles Mix County, particularly western Charles Mix 12 County, never was there anything less than a quarter of a 13 mile utilized when these maps were drawn originally and 14 for a period of decades. 15 Let's now show the map that NorthWestern Energy 16 is offering. And I think that is -- that's a comparison, 17 please. And I think that would come from the Affidavit 18 of Michael Sydow. And we looked at that. 19 Okay. Would you make those sort of equal so 20 that the Commission can get a good comparison. 21 All right. The first thing that should jump out 22 at you is the fact that Charles Mix Electric has lost 2.3 20 acres here, 20 acres here, 10 acres in the corner, 24 20 acres to the west, and 20 acres also to the west and 25 further south.

If I could direct your attention to this stairstep effect here and see that it is also in their map, you can see the difference between the 1998 map on the left-hand side and the 1979 map. This is what I'm referring to as territory creep. That becomes important, especially as these smaller towns, the few that are expanding, do expand.

8 Now I want to point out another problem with 9 NorthWestern's maps as they offer them to you in their 10 exhibits. I want to point out -- let's look at the maps 11 of Geddes. And I think, Kassie, if you could pull up 12 hearing Exhibit 10 and No. 16 side by side.

Make those -- the east boundaries. Because you might remember and I'm sure you read a lot of papers but I'm going to direct your attention to the response by NorthWestern Energy.

What they indicated in their responsive
Affidavit, their responsive pleading, was that, no, in
Charles Mix County we do, in fact -- in fact, Geddes is
the leading example of where we used the 1/64th line
rather than what I call the quarter section line but it's
actually a 1/16th.

But if you read our petition, what you discover is we say except for a situation where the boundary, the utility boundary, is coincident with the municipal

1 boundary. Except for that, we have generally used what 2 I'm going to call a quarter mile line uniformly. Their 3 response is, no, that's not true. But let's take a look and see if it is. 4 5 Kassie, can you pull out the eastern side on the 6 exhibit on the right. Eastern side of Geddes. Make it a 7 little larger so we all can see it. 8 All right. Now I want you to compare those two. 9 You see that the corporate boundaries for the City of 10 Geddes is outlined there. By the way, this comes from 11 the PUC official map. This is the one that was offered 12 in response. 13 And can you make that a little larger so we can 14 see how the boundary of Geddes has changed. 15 All right. You see that although the eastern 16 boundary for the utilities appears to be the same, 17 somehow Geddes got moved over, the corporate limit for 18 the city of Geddes got moved over so as to create --19 highlight this, please, Kassie. So as to create this 20 strip of land that is approximately an eighth of a mile 21 rather than a quarter of a mile. That's what their 22 response says, but it's just not true. 23 Moreover, for a map that's dated 1998 where is 24 this additional southern addition? Because that occurred 25 in 1989. This map isn't accurate. What NorthWestern

1 Energy has offered you is not accurate. 2 This is your own map. And it does show the addition that occurred in 1989, and it shows that, in 3 4 fact, the boundary for the utility is the corporate 5 boundaries. I don't know. I guess Mr. Oostra will have 6 to explain that. 7 But let's look at where these boundaries are. 8 We've got a quarter mile here on the west, another 9 quarter mile north of the section line, quarter mile on 10 the east side, also on the north side of the section 11 line. Quarter mile, quarter mile. 12 Now let's go look at Platte. You can just pull up -- Exhibit 7 will be fine. 13 14 All right. Okay. With regards to Platte, we've 15 got a quarter mile there in the northwest, another 16 quarter mile, once again quarter mile, crossing the 17 section line, quarter mile, quarter mile. And if you 18 look at it, that is consistent all the way through, but 19 suddenly we have the anomaly, the 1/64th, which, in fact, 20 did not exist on the original archived Charles Mix Electric map. 21 This one is correct. This is theirs when they 22 2.3 did it right. But since that time -- and you have to --24 using it for two decades. All the sudden there's that 25 creep, both on the south side and on the west side.

1	We submit that we want the boundaries that we
2	bargained for, that really have existed all of this time.
3	Mr. Mengenhauser is here for a good reason and that is to
4	explain to you and I'm going to ask him to explain now to
5	this Commission how it came to be that his folks, my
6	folks, my clients, didn't notice for five years that
7	Mr. Chad Johnson had built right up against the city
8	limits here and that in order to indicate that it was not
9	a voluntary waiver or anything else on our part,
10	Mr. Mengenhauser, would you please address the Commission
11	and tell them, why is it that Chad Johnson put a house
12	there in our territory that was serviced by NorthWestern?
13	MR. MENGENHAUSER: I'm Mark Mengenhauser. I'm
14	the general manager of Charles Mix Electric.
15	Mike's question to me was why didn't we notice
16	that right away? Well, it's in a section of town that
17	we there's no through traffic, no roads, and we did
18	not notice the construction until the last services were
19	built last fall and afterwards were started. So we just
20	didn't have access to that and weren't available to it at
21	the time.
22	Can I answer any questions?
23	COMMISSIONER HANSON: Do any of the
24	Commissioners at this time have any questions?
25	Thank you.

r

1 MR. WHALEN: Kassie, would you please pull up 2 hearing Exhibit 50, I believe, 5-0. 3 Okay. What this exhibit shows is the 1979 map on the left with the 40 acres on either side of the 4 5 section line showing what we believe is the correct map, 6 and also at least on the right-hand side you can see the 7 creep that has occurred versus NorthWestern's own map 8 that is to the west there shaded in yellow. And that at 9 least from these maps -- and the one on the right is the 10 PUC map as appears online, there's still -- there should 11 be 40 acres there on the east side of the section line. 12 And then here there is now 60 acres, according 13 to the so-called official PUC map, rather than 40. We 14 submit that that is an error and has been an error and 15 that the original ought to control. 16 We have hired a licensed surveyor, registered 17 surveyor. His name is Brett Kennedy. And, Kassie, 18 please bring up trial Exhibit No. 8. 19 We've asked him to actually go out there, walk 20 it off, stake it, and try and determine where we think -now I'll represent that NorthWestern Energy agrees but 21 22 where we think it is based on the original map. 23 And if you'll call out the upper right-hand 24 portion. In fact, let's see. Maybe we have a prepared 25 exhibit in that regard. Maybe No. 12.

1 All right. Now the two -- the red lines on each 2 of these two documents that are displayed, this is the 3 1979 map that NorthWestern used for two decades, and here 4 on the right-hand side is Mr. Kennedy's drawing of that. 5 And it's kind of off screen, but over here it says 6 May 29, 1979. 7 And what's nice about this is that it shows the 8 location of Sunset Acres. And we would like to indicate 9 to the Commission that that -- that right about there as 10 I'm showing you on the display is where NorthWestern Energy claims the 1/64th line is. But, in fact, they 11 12 didn't claim that for two decades. That's my effort to 13 try and show you where Sunset Acres is with respect to 14 the disputed boundary. 15 So what do we propose? 16 Kassie, please pull up trial Exhibit No. 13. 17 We propose to actually use the old descriptions, 18 which should have been used really to start with. None 19 of us would be here or at least I wouldn't be here if 20 legal descriptions had been utilized instead of the map. 21 Well, you can see that this conforms to what 22 NorthWestern Public Service had in their internal documents from 1979 through 1998. And we would 23 24 propose -- you can see down just as I indicated in 25 quarter quarter sections, and that's what we propose.

1 Now we think that's fair. That's in keeping 2 with the original map. And we'd like -- despite the Staff -- where did Mr. Tysdal go? Despite his 3 4 recommendation, we think there's some problems with your 5 map, Mr. Tysdal. I guess this would be as good of time 6 as any to visit about that. 7 Let's take a look at what is -- I understand 8 Mr. Tysdal is responsible for, and that is hearing 9 Exhibit No. 5. And would you call out the author of that 10 map down in the bottom right-hand corner. That's you, 11 isn't it, Matthew? 12 Yep. MR. TYSDAL: 13 MR. WHALEN: Okay. Let's go back to it, please. 14 And would you call out this area? Can you do that, 15 Kassie? No. Not all the way down. That's good. All 16 right. 17 And then juxtapose into that that -- I think 18 it's Exhibit No. 6. And call out the middle portion 19 showing the S curve. Make this larger, please. 20 That S curve right there that you All right. 21 can all see on the left-hand side, I think that's a 22 Google or a variation of a Google. It corresponds with 2.3 the S curve here through Sunset Acres on the right. 24 And we know that the boundary that existed at 25 least for a couple of decades is located here to the east

1 of Sunset Acres, and the boundary as claimed now by 2 NorthWestern Energy almost tracks -- about 50 to 55 feet 3 of the westernmost portion of Sunset Acres is in 4 Charles Mix Electric's territory. 5 Now we see that Mr. Tysdal put that -- put the 6 boundary between the two right on the road, which doesn't 7 correspond with what Charles Mix claims, nor what 8 NorthWestern claims. And I would suggest that's a simple 9 mistake.

10 And, you know, it's very easy to make a mistake. 11 I was wandering around hallways when I was supposed to be 12 paying attention to you folks. And what I discovered on 13 the staircase going down -- I don't know if anybody saw 14 it, but the big staircase, the one at the top, the third 15 baluster on the left is upsidedown.

16 So I know and you can legitimately tell me that 17 I'm anal, but on these maps we need to be anal. And 18 that's -- I'll submit myself to any questions you might 19 have.

20 CHAIRMAN HANSON: Thank you. We will hear 21 from -- generally we wait until the very end and then ask 22 However, if a Commissioner ever asks, then questions. 2.3 they get to ask the question. 24 Commissioner Nelson has asked. 25

Thank you.

This

COMMISSIONER NELSON:

1 particular map, where did you get this? 2 MR. WHALEN: That was offered by NorthWestern at a -- at a meeting between Charles Mix -- I believe 3 4 that's where it came from. That was sent to me by 5 Matthew Tysdal. 6 COMMISSIONER NELSON: Okay. Then if I might 7 ask, Matt, this is not one of your exhibits? 8 MR. TYSDAL: That's correct, Commissioner. I 9 made that map back in December so it was at the request. 10 This was when the issue first arose, and that was -- I 11 mean, first of all, understand that that is not a final draft. That wasn't Staff's position. 12 13 It was to display roughly where the line would 14 be if it was at the 1/64th line. But, no, that is not 15 one of my exhibits. 16 My apologies. We should have MR. WHALEN: 17 just -- we should have Ollie North'd it. 18 COMMISSIONER NELSON: Thank you. Can you pull 19 back up PUC hearing Petitioners Exhibit 8, please. 20 MR. WHALEN: Kassie, Kennedy's map. Any 21 particular portion? COMMISSIONER NELSON: Well, this is different 22 2.3 than what he had attached on his Affidavit. 24 Can you explain to me why this is different than 25 the Affidavit?

1 MR. WHALEN: Yes, I can. 2 Kassie, will you call out the area I am 3 indicating right there. Yes. You see where it says 1/64th. 4 5 COMMISSIONER NELSON: Yes. 6 MR. WHALEN: It said 1/32nd. By oversight of a 7 professional engineer. Yet again, an indication we're 8 all human. Consequently, I said, no. You go back and 9 you correct that. I'm not going to display it to the 10 Commissioners. So pull back, please. You will note if you look 11 12 at the date somewhere in that area -- April 8, and that 13 is a modification that occurred between his Affidavit and 14 this one because he had 1/32nd down instead of 1/64th. 15 Other than that, it should be pretty much identical. 16 COMMISSIONER NELSON: So that everything is 17 crystal clear, 1/64th is, in fact, the appropriate 18 designation for that line, not 1/32nd? That's correct. 19 MR. WHALEN: 20 COMMISSIONER NELSON: I have to publicly 21 apologize to Mr. John Smith because yesterday I was 22 hollering at him that, no, a professional surveyor would 23 not make a mistake and reference something at 1/32nd when it's 1/64. So my apologies, Mr. Smith. 24 25 MR. WHALEN: Mr. Smith is errorless at this

time. 1 2 COMMISSIONER NELSON: I quess the last question I've got, you ended by talking about your proposed 3 4 solution to all of this. 5 Are you also proposing that if we were to accept 6 your solution, compensation for the infrastructure 7 NorthWestern has already placed in the ground? 8 MR. WHALEN: No. 9 MR. MENGENHAUSER: Yes. 10 MR. WHALEN: You want that? He's the boss. CHAIRMAN HANSON: Because we're on record here, 11 12 we need to -- and since people cannot hear what is being 13 said off mic., you need to --14 MR. WHALEN: Mr. Mengenhauser has indicated 15 that, yes, he does propose and would prefer then to 16 compensate for the infrastructure on the ground, and my 17 answer was wrong because I'm an attorney and not a 18 general manager. 19 COMMISSIONER NELSON: At this point that's all 20 the questions I've got. I greatly appreciate the 21 opportunity to clarify that before we go further. I may 22 have some other questions when we get done, but that's all I need for now. 2.3 2.4 MR. WHALEN: Very well. And thank you very 25 much. Appreciate it.

1	CHAIRMAN HANSON: We're off record right now.
2	(Discussion off the record)
3	MR. OOSTRA: Good afternoon, Commissioners. My
4	name is Jon Oostra. I'm here on behalf of NorthWestern
5	Energy. I'm in-house corporate counsel in Sioux Falls.
6	With me is Michael Sydow. Mike Sydow is the
7	general manager of operations for South Dakota and
8	Nebraska. He's been with the company for, I believe,
9	35 years.
10	And I also have with me Ron Goglin. And Ron has
11	helped the Commission before in answering some of these
12	questions. I believe he's been with NorthWestern for
13	also nearing 35 years. And he is a land specialist and
14	works with our acquisition group on a lot of our land
15	matters.
16	I'm going to start off by just responding to a
17	couple of the one, what I will say is I think a pretty
18	significant flaw in Mr. Whalen's analysis, and that is
19	he's missing a map. And I'm not going to be critical of
20	him because up until yesterday I didn't have the same
21	map.
22	So when I filed my brief I was relying on the
23	maps that were on the PUC's website. And they're the
24	ones that I'll call the blue maps with the big wide blue
25	lines. And they do say when you look at them they say

1	that it's the official electric territory maps.
2	There's no date on them. And I made the
3	assumption, incorrect assumption, that those were the
4	maps from the 1970s. That was corrected by Mr. Tysdal in
5	his filing on Friday. And that was the first time that I
6	became aware of another whole set of maps for
7	Charles Mix County.
8	And those maps, in my opinion, are clear. So
9	although in my brief I refer to the blue maps as the
10	official maps, I've been corrected. I was not aware that
11	those were not official maps, but those were prepared by
12	Staff. And I'm not sure how long ago, but it sounds like
13	in the last I don't know how many years, but those aren't
14	the official maps.
15	So our position is that we would respectfully
16	request that you reject the claims of encroachment and
17	confirm the territory boundary on the north-south 64th
18	line in the southwest quarter of the northeast quarter of
19	Section 23.
20	When I took a look at the maps that Mr. Tysdal
21	provided on Friday and compared them up against the blue
22	maps, my analysis was that they were fairly consistent.
23	And so my argument is the same, and that is that we
24	should rely on the official maps.
25	Now what we didn't see in Mr. Whalen's approach

Г

or in his analysis was much of the signed map from 1975 that they have in their possession. And the reason for that is because it's not clear. Now you saw the scribbled lines. You saw the crayon marks. It really is not clear.

And, you know, that's the problem here is that these maps, there really aren't any maps that are a model of clarity. I'm not going to sit here and say that I can tell you exactly, exactly where the line is.

10 I can tell you what we believe that the maps 11 suggest. And when you look at the official map and when 12 you do what Mr. Tysdal did in his analysis and you 13 compare the territory that was granted to NorthWestern in 14 Section 23 and you have to compare that territory from 15 the section lines, in other words, how far do we go east 16 into the west when looking at the other territories 17 around town, particularly where we did use 16th lines, 18 you can see that NorthWestern was granted what we believe 19 was a larger territory in Section 23.

Now going back to this issue of whether or not we used 64th lines or not, and even on the Gettysburg -or the Geddes map. I'm sorry. Gettysburg?

On the Geddes map if you go back and you look at the official maps that Mr. Tysdal has and that Staff has, you'll see some of the clarifications. You know, the 1 internal map that NorthWestern has -- and I'm sorry I 2 don't have it up in front of us here, but it doesn't show 3 the area below Geddes, and I don't think that the 4 original maps that the PUC have either.

5 I can't tell you why they set the line on the 6 64th line. I can't tell you why they would have done 7 that in Platte. I can tell you that we do believe it's 8 set on the 64th line in Geddes. So it is not some 9 anomaly that never occurred. And I can also tell you 10 that it's not inconsistent with what's been done across 11 the state in other areas. We use section lines. We use 12 quarter lines. We use 16th lines. We use 64th lines. 13 Okay.

And so when you look at the map that Mr. Tysdal provided, our opinion is and our belief is it suggests a line beyond the 16th line. And once you get beyond the 16th line, the next appropriate line to use would be the 64th line.

19 Now go back to the 1979 maps for NorthWestern. 20 That is a map that was utilized by NorthWestern. Μv point is that, number one, it's an internal map. 21 Ιt 22 wasn't an official map. It was created -- and I'm going 2.3 to make some assumptions based on the fact that it was 24 1979. But it was probably created by a draftsman, a hand 25 drawing of that map based on what was available to him at

1 that time.

-	
2	I've looked for maps clarifying between 1979 and
3	1998. We don't have any in our possession, to my
4	knowledge, but over time with technology improving, with
5	the ability to enlarge territories, with the ability to
6	draw lines with AutoCAD we took another look at those
7	territory maps and made the determination that the line
8	in that area of town was not correct. And so we adjusted
9	our line.
10	Now I don't think that's unreasonable. And, in
11	fact, it's actually I think consistent with what the
12	official map shows, and I think it's consistent with what
13	I'll call the blue map that Staff developed at some point
14	over time.
15	I think it's also important to note that it's
16	not a map that appears to have been created when Sunset
17	development was coming Sunset Acres was coming in.
18	The latest we believe it could have been created was in
19	that 1998 time frame when we were going through and
20	updating all our maps.
21	To the best of my knowledge, Sunset Acres didn't
22	come into play until at some point in 2005, 2006 when
23	Mr. Johnson started developing the property and built his
24	house.
25	
	So we recognize that the old map exists. We

1 don't think that it's a factor that overrides the 2 consideration that you should give to the official maps. 3 We believe that's where the analysis starts is taking a 4 look at the official maps.

5 We do believe that Staff did a very nice job in 6 explaining in their letter their position, and we agree 7 with that position. And we would respectfully request 8 that you rely on those official maps and confirm our 9 territory boundary again at the north-south 64th line 10 separating the southwest quarter of the northeast quarter 11 in Section 23 on the south side of Platte.

12 CHAIRMAN HANSON: Thank you. Did you wish to 13 share any of those maps that you have there, or are 14 they -- you made reference to them. I'm not -- I believe 15 we already have them.

MR. OOSTRA: No. That's fine. I think you do. And it shows my lack of expertise. I wasn't planning on sharing these today. I was trying to blow them up, and, of course, they printed on legal paper and all the rest.

But, you know, this is the official territory map, what I call the blue map. And, again, it's cut into eight or 10 different sections. And this is the official map, and I believe you have both of them in front of you.

25

CHAIRMAN HANSON: Okay. Thank you for that

1 clarification. Yes, we do. I'd like to hear from Staff at this time. 2 Mr. Tysdal. 3 4 MR. TYSDAL: Yeah. Thank you, Mr. Chairman. 5 So I think to start, I want to touch base on 6 some of the things I said in the letter in general 7 terms. 8 So sort of the problem that we have here is that 9 Charles Mix has a signed map just like we do. My 10 understanding of what I know of the project is I thought 11 that back in the '70s each company probably drafted these maps, made copies for each other, and then submitted one 12 13 to the PUC. So, I mean, that's my understanding anyway. 14 But, of course, these are hand drawn, and so 15 you're going to find subtle differences between the 16 copies, and you'll find, I think, human error. And I 17 think that's what we see in Charles Mix's map is, first 18 of all, while it does appear to my eye in their map that 19 there is more territory allotted to NorthWestern in 20 Section 23 than in Section 24, that north-south boundary 21 seems to line up perfectly with that north-south boundary 22 in section 11, which all parties agree is at the 2.3 16th line. 24 So that would indicate that there's something 25 wrong in Section 24. And it does, in fact, appear that

1 the north-south boundary in Section 24 on Charles Mix's map is further west than perhaps where the 16th line 2 3 would be. 4 So I only bring those problems up with 5 Charles Mix's map to establish that when we're depending 6 on a hand drawn map there will inevitably be issues and 7 mistakes. And I think that those that I flagged on 8 Charles Mix's map I think can be attributed to human 9 drawing error. 10 Since NorthWestern has conceded the point that the maps found online are not, in fact, the official 11 maps, I don't want to spend a lot of time on those, other 12 13 than to point out that when they were drafted -- and I 14 don't know when that was -- the person that did it has 15 since left the Commission. It seems to me he did 16 obviously interpret the line in Section 23 to be at the 17 64th. 18 So, finally, I'll move on to my map here. And I 19 do -- I should probably apologize to both parties for not 20 producing this recommendation earlier. But I don't think 21 there are -- there are profound differences with it and 22 the other two maps presented but more subtle. 23 From Staff's perspective it does appear that 24 Section 23 there is more territory allotted to 25 NorthWestern than in Section 24. There is a noticeable

1 difference between the north-south boundary in Section 23 and Section 11 in that the one in Section 23 is farther 2 to the west. So if both parties concede that 3 4 Section 11's north-south boundary is located at the 5 1/16th line, it would indicate to us that the boundary in 6 Section 23 is, in fact, at the 64th. 7 As I ramp up -- and that -- I stated all of that 8 in the letter, and I hold to that now. 9 The other thing I brought up is that in its 10 original Petition Charles Mix did bring up a number of 11 other factors for consideration, which I stated we did not evaluate in making our recommendation. And we 12

13 didn't -- we did that not because we don't think that 14 they're important or that they're not material but 15 because we think that it should be for you Commissioners 16 to decide if they are or not.

Our perspective is that we have to depend on the maps that are filed with the PUC, and that's why ultimately we went with the recommendation that we did. Because I think you could draw a different recommendation from using Charles Mix's map. And the problem is that it's also signed by both NorthWestern and Charles Mix Electric.

24 So, you know, we're kind of in a sticky 25 situation here in that everybody's working off of maps

that were drafted in the '70s where roughly seven-sixteenths of an inch, and that can change depending on the ruler you're using, represents a mile. And the difference in the boundary we're talking about right now is 660 feet. So it's an eighth of that distance. So you can do the conversion, but an eighth of seven-sixteenths of an inch is not significant.

8 So we've made a recommendation that the 9 boundaries at the 64th line based on what we estimate 10 from an examination of these maps with the naked eye. 11 The maps are not perfect. There's ambiguity even in 12 ours, although I do think ours is more clear than the one 13 Charles Mix has.

However, you know, I can think of a number of scenarios that might leave one to believe -- or might leave one to think that the boundary was drawn as it is for a number of reasons. And I won't go into those, but that's my point is that it -- you know, you're looking at this with the naked eye. It's tough.

We're going through this process now of establishing these boundaries and writing out legal descriptions, and we depend on the consent of the companies. You know, Mr. Whalen pointed out that the map that I provided to NorthWestern back in December, and I think he pointed out rightly that the 64th line is marked

1 incorrectly on there. I mean, so there are problems with 2 our map too. So we depend on the companies to review our 3 4 boundaries and tell us when they have issues. So we've 5 arrived at this, the circumstance that we have today, 6 unfortunately, because we weren't able to work out an 7 agreement prior to this happening. 8 But, you know, I guess my overriding point to 9 you is that we've made a recommendation, but it's a soft 10 recommendation. I don't know that you do or do not want 11 to evaluate the other factors that Charles Mix placed in 12 their Petition, but, ultimately, from our perspective it 13 seems that the boundary is located at the 1/64th line. 14 So I'm available for any questions that you 15 might have. 16 Thank you, Mr. Tysdal. CHAIRMAN HANSON: 17 Turn to -- I believe that's all the folks that 18 are -- from Staff that are going to testify; is that correct? 19 20 We'll turn to questions from the Commissioners 21 at this time. 22 Commissioner Nelson. 23 COMMISSIONER NELSON: A couple of questions for 2.4 NorthWestern. 25 Charles Mix Electric submitted to us a map that

1 was signed back in the '70s by both parties. You're 2 familiar with that. Staff in its Exhibit B submitted as 3 to us a map that was signed by both parties back in the '70s. 4 5 Why has NorthWestern not brought forth their map 6 that was signed by both parties in the '70s? 7 MR. WHALEN: I'm going to ask Mr. Goglin to come 8 He has a bit more experience than I do. up. 9 MR. GOGLIN: The reason is we don't have a 10 map --11 MR. SMITH: Can you introduce yourself, Ron? 12 MR. GOGLIN: Ron Goglin, NorthWestern Energy. 13 In our file we do not have a map that's signed 14 by both parties. We had a map that he has a copy of that 15 says Official Map on it, but it is not dated and not 16 signed. 17 COMMISSIONER NELSON: Thank you. 18 The next question I quess I've got, if you could 19 maybe help us understand, if I understood Charles Mix 20 correctly, there are currently four residences that you 21 are serving; is that correct? And a fifth one being 22 constructed; is that correct? 23 MR. GOGLIN: I believe that's correct. But Mike 24 Sydow would be able to answer that better than I can. Нe 25 has that information.

1 MR. SYDOW: Good afternoon. I'm Mike Sydow, 2 general manager of T&D Operations for South Dakota and Nebraska with NorthWestern. 3 4 COMMISSIONER NELSON: And my question was it's 5 my understanding that you're currently serving four 6 residences in Sunset Acres and a fifth one being constructed; is that correct? 7 8 MR. GOGLIN: I believe that's correct. 9 COMMISSIONER NELSON: Can you tell us what kind 10 of infrastructure that you have placed into that area in 11 order to serve those and any future residences that might 12 be constructed? 13 MR. SYDOW: I believe -- it's underground 14 infrastructure. I believe it's single phase. I would 15 need to confirm that in its actuality. To make sure it's 16 three phase or single phase is the part I'm uncertain of 17 when we bring it down into that subdivision. 18 COMMISSIONER NELSON: And so what kind of feeder 19 facility? You don't know what kind of feeder facility 20 you brought down into that area? 21 MR. SYDOW: Feeder facility, meaning what type of wire? 22 23 COMMISSIONER NELSON: Exactly. 24 MR. SYDOW: It would be 1 OP jacketed 25 underground cable.

1 COMMISSIONER NELSON: Okay. And sufficient to 2 serve the entire subdivision, should it all be built out? MR. GOGLIN: 1 OP jacket of cable would be 3 4 sufficient to serve 11 homes, yes. 5 COMMISSIONER NELSON: I think that's all the 6 questions I've got. Thank you. 7 CHAIRMAN HANSON: Thank you. 8 Commissioner Fiegen, do you have any questions? 9 COMMISSIONER FIEGEN: You know, my main 10 concern is that we go back to 1975 and look at what the 11 original map said. And I don't know if you showed that, 12 Charles Mix. 13 Did you show the map of 1975 that is the 14 official map with the PUC Commission? 15 MR. WHALEN: We did. Would you like us to bring 16 it up? 17 COMMISSIONER FIEGEN: Yeah. Could you pull that 18 up? 19 It's tricky because the 1975 -- I wasn't a 20 legislator, but I sure wish they would have given 21 utilities more than six months to develop these maps, and 22 we would have descriptions instead of nearly crayon 2.3 drawings, I mean, kind of. So you never know. But the 24 official map of 1975 that's on the Commission --25 MR. WHALEN: The Commission's?

1 COMMISSIONER FIEGEN: Yes. 2 MR. WHALEN: Okay. The blue map? Is that what you're asking for? 3 4 COMMISSIONER FIEGEN: Well, I have a pink one. 5 MR. WHALEN: Okay. I don't have that one. That 6 one came out Friday. 7 CHAIRMAN HANSON: I believe you have presented 8 this as Petitioner's Exhibit 2. It's on page 5. And 9 then you blew that up; isn't that correct? 10 MR. WHALEN: Yeah. That's ours that came out of 11 our archives out of the vault. We can bring that up if 12 you like. 13 MR. SMITH: It's Staff Exhibit B. 14 CHAIRMAN HANSON: Staff Exhibit B. 15 B. Is this the one that you're --MR. WHALEN: 16 CHAIRMAN HANSON: Excuse me. Nobody's going to 17 chat because we have someone trying to type. 18 So Commissioner Fiegen has the floor, and the 19 Chair will occasionally interrupt to make certain that 20 we're going on a direction here. 21 COMMISSIONER FIEGEN: So my question is if he 22 has showed us the map that is on --23 CHAIRMAN HANSON: And I will ask if someone has 24 that map, please indicate. MR. TYSDAL: Mr. Chairman, I think the map that 25

1 I produced with the letter that I released on Friday is not a part of his presentation, I think; right? 2 Correct, Mr. Whalen? 3 4 MR. WHALEN: That's correct. 5 COMMISSIONER FIEGEN: Okay. So, you know, 6 that's a -- all the maps that you showed we just have to 7 remember what the court is going to say and what the 8 court precedence is. And it's the official map. So we 9 have to go back to the official map. 10 And I guess I don't have anymore questions for 11 you, but I just wanted to make sure -- if you showed it, I wanted to see it because I have the Staff Exhibit B 12 13 because I wanted you to compare it with other things that 14 you had. But since you don't have it, we're not going to 15 do a comparison today. 16 But as a Commissioner that's the map I have to 17 look at. I can't go look at NorthWestern's internal maps 18 because the courtroom, the Supreme Court, certainly has 19 shown that that's not what we need to look at. 20 So if you don't have them to compare, I have no 21 further questions. 22 CHAIRMAN HANSON: Any further questions from 23 either of the Commissioners? 24 Seeing none, we'll close it to -- excuse me. 25 MR. SMITH: I just have one question that

1 doesn't have anything to do with substance. 2 But in terms of the documents, my understanding 3 is that the parties had a conversation about their 4 willingness to basically accept the exhibits that you had 5 here as acceptable for an official record in case this 6 were to go up on appeal. Is that --7 MR. WHALEN: That's correct. 8 What you'll find, Commission, and Mr. Smith, in 9 the record is a motion for an evidentiary hearing and 10 then retraction and withdrawal of that based upon a 11 stipulation that these documents become part of the 12 record in the event that an appeal might be appropriate 13 and necessary. 14 Do you want to --MR. SMITH: 15 CHAIRMAN HANSON: Thank you for that 16 clarification. 17 Does NorthWestern attorneys, counsel wish to --18 MR. OOSTRA: I just want to make one brief 19 statement with regard to the last question. 20 CHAIRMAN HANSON: Please step to the mic. Thank 21 you. 22 MR. OOSTRA: We did have a discussion with 23 regard to the exhibits that were put into the record. We 24 don't take exception with those original maps. 25 Part of what we've -- we agreed to did not

1 include at that point the official map. So at that point again I was incorrectly referring to the blue map as the 2 3 official map. 4 The only exception we had to the exhibits was 5 that there was a -- the 1979 line -- the 1979 line was 6 dropped onto the survey. And we took exception to that. 7 And my understanding was -- because we didn't feel that 8 the surveyor surveyed that actual line. 9 The surveyor just put that line on the survey at 10 the request of Charles Mix. So we did take exception to 11 that, and I wanted to make sure that was in the record. 12 And it's my understanding, and Mr. Whalen can 13 clarify, that they weren't using that exhibit for the 14 purposes of establishing the line. 15 MR. WHALEN: No. That's correct. 16 MR. SMITH: Basically what I was getting at is 17 not that anybody agrees necessarily with what anything 18 shows or doesn't show but just that we can accept those 19 as an official record here for just in case this thing 20 were to go up the ladder. 21 And we may; is that correct? 22 What about Staff's Exhibit B? I know it didn't 23 exist when you guys had your chat. Just for the purposes 24 of the official record, does anybody have a foundation 25 objection to that or anything like that?

1 MR. WHALEN: No objection from Charles Mix Electric as to foundation or authenticity. 2 3 MR. OOSTRA: No. I just -- I'm missing the 4 bundle of maps that were given to us today, all the stuff that was done in the PowerPoint. 5 6 CHAIRMAN HANSON: And you are receiving one now. MR. OOSTRA: And I'm sorry. I just wanted to 7 8 quickly clarify that there was nothing in here that we 9 had taken objection to. 10 CHAIRMAN HANSON: Go ahead and -- Commissioner 11 Fiegen, do you have a question of --12 COMMISSIONER FIEGEN: I just have one more 13 clarification question. I'm going to ask Staff first 14 because I know you said this, and then I want to ask the 15 other parties. 16 In the official map that we think is official 17 that we saw Friday uploaded on our website what you said 18 is that Section 11, we believe that boundary is at the 1/16th? 19 20 And then the boundary west in the Section 23, is 21 that 1/64th? Is that correct? 22 MR. TYSDAL: That's correct, Commissioner. 23 COMMISSIONER FIEGEN: So that line is not 24 straight. Well, it might be straight, but it's not 25 perpendicular.

1 MR. TYSDAL: Right. You're kind of hitting the 2 nail on the head here right now in that you're looking at it with the naked eye, and it's very difficult to tell. 3 If you hold a ruler to it, you'll see the boundary in 23 4 5 is farther west than in Section 11. 6 COMMISSIONER FIEGEN: So both parties, could you 7 comment on that map? Because that's certainly a deciding 8 factor in our hearing today. 9 MR. OOSTRA: And we read the map the same way. 10 When I look at that map I see a couple of things. 11 Number one, I see the line from the section line 12 being longer to the west as compared to the east. Where 13 on the section line going to the east you can see in 14 Section 24 it's supposed to be on the 1/16th line. We 15 agree with that. So it is a broader -- it is a larger 16 territory to the west. Okay. 17 And then I think what Mr. Tysdal was indicating 18 is if you go up to 11, again, the line in 23 when you 19 measure it to the west goes further to the west than the 20 line in Section 11. It's certainly longer than the line 21 in Section 12. And that, again, is -- I realize we're 22 dealing with some imprecise drawings, but that's our 23 argument. 24 COMMISSIONER FIEGEN: Thank you. 25 In answer to your question, if we MR. WHALEN:

1 could -- Kassie, would you please pull up hearing Exhibit 2 No. 3. And let's take the ruler that you have in this 3 computer and draw north-south lines through the center 4 from north to south in the corners. Yeah. Also east to 5 west. That's good. 6 That's our answer, Commissioner Fiegen. 7 COMMISSIONER FIEGEN: But what map is this one? 8 MR. WHALEN: The official PUC map as published 9 online. Consequently, what we're saying -- what we're 10 saying here is that if the north boundary is an 11 indication of where the lines ought to be in the south 12 and you line them up, what you discover is that there is 13 660 acre -- there's a, I'm sorry, 660 feet strip, wide 14 strip, too much on the west side here where that FAS is. 15 And that's where Sunset Acres is. 16 And then if you run the line also east to west 17 just south of the section line, you discover that it is 18 consistent. This is, in fact, an anomaly and is not one 19 that should be on the official map. That's our answer. 20 Does that help or not? 21 COMMISSIONER FIEGEN: So Staff -- the map that 22 we have in Exhibit B is the official map; correct? 23 MR. TYSDAL: Commissioner Fiegen, it is our 24 opinion that in the case of a dispute as we have today 25 that the PUC needs to rely on the maps that were filed

with the Commission in the '70s. And in this case that 1 2 would be Staff's Exhibits A and B. B is simply a zoomed in view of Exhibit A on Platte. 3 4 COMMISSIONER FIEGEN: So it certainly appears to 5 me that NorthWestern in 1975 was granted extra acreage in 6 Section 23. 7 CHAIRMAN HANSON: In '75 you're saying? COMMISSIONER FIEGEN: Yeah. The original map of 8 9 1975, I believe. Was the original map of 1975? Right? 10 December of 1975. Because the legislature only gave them 11 like less than six months. 12 CHAIRMAN HANSON: Thank you. Any further 13 questions at this time? 14 Is there -- is there any discussion preceding a 15 motion or is there a motion? 16 COMMISSIONER NELSON: If I might have some 17 discussion, Mr. Chairman. 18 CHAIRMAN HANSON: Go right ahead. 19 COMMISSIONER NELSON: To Commissioner Fiegen, 20 just so that we're very, very clear, this blue map is a later rendition. And so I don't know that we can give it 21 22 any credibility. 23 And as I try to find the answer to this question 24 there are really only two maps that I'm looking at. I'm 25 looking at the map that Charles Mix Electric -- the

1 official map that was signed by both parties in the '70s. 2 I'm looking at that map, and I'm looking at Staff 3 Exhibit B. Because that also was a map signed by both 4 parties in the '70s. 5 So I consider those to be maps that were 6 unequivocally agreed to by both parties at that time. NorthWestern for whatever reason can't find 7 8 their version of that, and so we don't have a third 9 option to look at. And so these are the two I'm looking 10 at. 11 Having said that, I've had my ruler out, as does 12 everybody else, and drawn the lines on both of these two 13 maps. And particularly on Staff Exhibit B, which is the 14 clearer of the two, the line is exactly halfway between 15 the quarter mile line and the 1/64th. It's exactly 16 halfway. If I look at the map that Charles Mix Electric 17 18 submitted, and it is a little fuzzier and the line is not 19 straight and I think we all know that but, in essence, it 20 is halfway between the quarter mile line and the 1/64th line. 21 22 And so if I had to make a -- if I had to make a 2.3 judgment as to where those two official maps placed the 24 line, it's going to be halfway between those two going 25 right through the middle of Sunset Acres.

1 Okay. Maybe I do have a question out of this. 2 Is there either side that would be comfortable with a 3 ruling running the line through the middle of Sunset 4 Acres? 5 Mr. Whalen? 6 MR. WHALEN: Could I visit with my manager? 7 COMMISSIONER NELSON: Absolutely. 8 COMMISSIONER FIEGEN: And is that the 1/28th 9 line; right? 10 COMMISSIONER NELSON: I don't know what you'd 11 call that line because none of our maps have that line. 12 It's --13 COMMISSIONER FIEGEN: That's where my 14 measurements are too is right between. 15 CHAIRMAN HANSON: While that is taking place I'm 16 looking at the official map. And the interesting thing 17 about the official map, the actual one that was drawn, is 18 if you put it on its side and look precisely down the 19 line as you stated, the line is at an angle, and it 20 begins the angle way up in Section 11 and continues 21 through Section 23, which is an oddity that I think we 22 can all recognize was not intended. 23 One would not draw a line starting at that 24 quarter quarter quarter point in Section 11 and draw it 25 through Section 23 to the end. Obviously, the intent was

1 to draw a perfectly north-south line there, and as it was 2 drawn you can see that it just varied from that position. 3 And that's where we come up with the oddity on the Section 23. 4 5 COMMISSIONER NELSON: Mr. Whalen. 6 MR. WHALEN: In response to your question, we would prefer that the baby not be cut in half. 7 8 COMMISSIONER NELSON: Thank you. 9 Mr. Oostra. 10 MR. OOSTRA: I believe we're of the same 11 position. 12 I'd like to have Mr. Goglin just briefly discuss 13 that from a surveying perspective. 14 MR. GOGLIN: One thing. The line drawn through 15 the middle of the subdivision to me does not make logical 16 sense because the subdivision didn't exist at that time 17 so they would have used a landline one way or the other 18 on the map. 19 So it depends on what map, like you say, and 20 seven-sixteenth of an inch or whatever is 660 feet. So 21 the fact that the line goes down the middle, I think you 22 need to refer to the closest landline to that line, which 23 would be the 64th or the 16th, whatever you decide. We 24 say the 64th, and Charles Mix thinks it's the 16th. 25 COMMISSIONER NELSON: Thank you.

1	MR. GOGLIN: The difference so
2	COMMISSIONER NELSON: Thank you. I appreciate
3	both sides. I was hoping that was going to be the answer
4	because I really didn't want to go there. Although the
5	precedent and I believe the law says that the maps
6	govern, and if we were to truly utilize the maps those
7	two official maps, that's exactly where the line would
8	go.
9	But since that is not acceptable to either side,
10	and, frankly, I didn't want to do that, I think that's a
11	poor answer, I am prepared to make a motion unless
12	somebody else wants some additional discussion.
13	CHAIRMAN HANSON: Just Mr. Smith.
14	MR. SMITH: Mr. Oostra, I just wanted to make
15	sure now you didn't have a foundation or at least basic
16	admission objection.
17	MR. OOSTRA: No. Thank you.
18	MR. SMITH: And is that true with respect to
19	Staff's letter and exhibit as well?
20	MR. OOSTRA: Correct.
21	MR. SMITH: Mr. Whalen.
22	MR. WHALEN: I agree.
23	MR. SMITH: Thank you.
24	CHAIRMAN HANSON: Mr. Whalen agreed.
25	Continuing the discussion, it will be

1 interesting to see where -- I think the two of us are 2 going to end up disagreeing, but that's -- I'm just 3 guessing at this juncture. 4 COMMISSIONER NELSON: That's happened before. 5 CHAIRMAN HANSON: Yes, it has. 6 As I said, when I look at the original map, and 7 I think we all recognize that it was not drawn as they 8 had at least intended, and we all agree that the law 9 states that the maps are supposed to take precedent, the 10 one thing that clarifies it for me is the subsequent maps 11 that were drawn as a result relying upon it. 12 And certainly since this was a 1975, 1976 13 action, that when NorthWestern drew its map in 1979, 14 certainly they had the ability for being a participant in 15 the entire process. They -- Martin Bigma [phonetic] was 16 here, the discussions were all fresh, and they drew their 17 map at that time based upon all of that information and 18 discussions. 19 So it clarifies it for me by stating that 20 NorthWestern understood it to be the location that they 21 show in Petitioner's Exhibit No. 5 as the May 29, 1979 22 map. 23 Any further discussion? 24 Commissioner Fiegen. 25 Mr. Chairman, I mean, it COMMISSIONER FIEGEN:

1 has been interesting because we certainly have got our 2 rulers out and done a lot of measurement. And when I 3 look at the measurement, and certainly I'm not a surveyor, it's actually kind of between the 1/64th and 4 5 the 1/28th. It's kind of in the backyard of those last 6 lots. And so then I have to look at, you know, what line is closer. And I believe it's the 1/64th. 7 8 I have to go back to that original map. I can't 9 look at -- I mean, for me personally I can't look at the 10 internal maps because they don't take precedence in the 11 courtroom. So although I would like it in the backyard of those lots, I don't believe I can do that, and the 12 13 1/64th is where I'm going to fall today. 14 CHAIRMAN HANSON: Is there a motion? 15 COMMISSIONER NELSON: I would move that we grant 16 Charles Mix Electric's Petition and that the line be 17 drawn on the quarter mile 1/16th line. 18 CHAIRMAN HANSON: Discussion on that motion. COMMISSIONER NELSON: Well, as we've already 19 20 talked about, I believe that both of the official maps 21 that are signed by both parties have the line in the 22 middle, that is both parties have said that's not where 23 they are comfortable with us actually drawing the line. 24 And so then I have to look at all the rest of 25 the evidence to determine where did they truly intend to

draw that line. And the things that I consider, first of all, is the fact that NorthWestern did not bring to us an original map signed by both parties. For whatever reason they can't find it, it isn't there, but they didn't bring that to us, and so I consider that.

6 But perhaps most compelling to me was the 7 testimony this morning and the maps dealing with Geddes. Because up to this point NorthWestern had been contending 8 9 that, yes, in Geddes we use the 1/64th lines, but the 10 testimony this morning or the argument, I should say, and 11 the maps showing that the reason it was on that 1/64th 12 line is because that's where the city boundary was. That 13 to me was compelling.

And so what that tells me is that there was or is, in fact, some precedent within Charles Mix County to use 1/16th lines, the quarter mile lines, and not the 1/64th. And I do think it would be odd that this would be the only place in Charles Mix County where a 1/64th line was used.

20 And so that is the reason that I am supporting 21 Charles Mix's Motion.

22 CHAIRMAN HANSON: Thank you. Further 23 discussion? 24 I stated earlier what my position was and the 25 clarification that I felt when I saw it, and I guess we

1 do agree.

2	COMMISSIONER FIEGEN: And I, first of all, want
3	to thank the parties for coming. You guys did a great
4	job of bringing us testimony and maps, and we certainly
5	appreciate all the hard work.
6	CHAIRMAN HANSON: Thank you.
7	Commissioner Fiegen.
8	COMMISSIONER FIEGEN: Fiegen votes no.
9	CHAIRMAN HANSON: Commissioner Nelson.
10	COMMISSIONER NELSON: Aye.
11	CHAIRMAN HANSON: Commissioner Hanson votes aye.
12	The Motion carries.
13	COMMISSIONER NELSON: If I might and I maybe
14	should have included there in my motion I do think we
15	have to deal with the issue of compensation of
16	infrastructure.
17	Mr. Smith, do you have a recommendation on how
18	we should handle that?
19	MR. SMITH: I don't know. Any the parties,
20	do you have any suggestions or like, Mike, would you guys
21	want to have a chat first with each other maybe after
22	this, and we'll take that up, if need be, at a subsequent
23	Commission meeting?
24	Mark? What do you think?
25	MR. MENGENHAUSER: Yeah.

1	MR. SMITH: You guys talk it over. Thanks.
2	Thank you.
3	(The proceeding is concluded)
