

## SUMMARY

### CPPC and Associated Companies

The purpose of this document is to enlighten interested parties as to the reasons for establishing ***Consolidated Power Producers Corporation***, a South Dakota, as well as North Dakota, Minnesota and Montana, chartered electric utility company dedicated to generating, transmitting and marketing energy generated by renewable resource systems. The three companies shown below represent separate stand alone entities established to support ***CPPC*** in its endeavors to provide existing power producing entities and new power producing entities that wish to be a part of ***CPPC*** and afford themselves the opportunity to own and operate, if they wish, or by joining ***CPPC*** they would be able to share in all the rights and privileges and potential profits of a bona fide electric utility company.

***Cimarron Light and Power Systems***, a civil, electrical and mechanical design build engineering company.

***Jasco Electrical Services***, an electrical light and power construction and maintenance company.

***Cimarron Leasing and Finance***, provides the funding and financing for all phases and products that are required and utilized in Consolidated Power Producers Corporation's offerings as a full service alternative energy and distributed generation utility company.

We will now elaborate on the purpose and functions of the four entities set forth above.

***Consolidated Power Producers Corporation's*** purpose and endeavors are dedicated to providing clients consisting of federal institutions, state institutions, municipalities industry consisting of manufacturing facilities, assembly facilities with the ways and means to utilize technologies currently available to them that will enable them to enjoy and be a part of the rapidly developing alternative energy industry. We now come to a very important part of ***CPPC's*** reason for existing and that is providing the general public, farmers, ranchers, corporate landowners, commercial business entities and the all important individual homeowners, with the opportunity to utilize through ***CPPC*** the ever evolving means to utilize electrical equipment available, such as wind, solar, fuel cell, methane driven generation systems as well as any product that lends itself to the convenience, protection and financial viability of the user. ***CPPC*** and its associated divisions will undertake to research and develop the manufacturing of complete energy systems as well as any component of an energy system that will further and enhance

AN **ENERGY EVOLUTION** co.

CPPC and its access to these supporting companies listed below in its performance of its obligations to the public it serves.

***Cimarron Light and Power Systems (CLPS)*** This entity consists of skilled and licensed civil, electrical and mechanical engineers as well as the required staff and access to pertinent information required and utilized in the design build of the generation facilities and transmission lines required to produce and move alternative energy power to market. The prime means of generating electricity will utilize primarily renewable energy resources. Although where the situation precludes the utilization of renewable energy resources CLPS will design a system utilizing any fuel resource that make the project viable.

***Jasco Electrical Services (JES)*** is a construction and maintenance company who's long experience in providing construction services to generation and transmission facilities as well as its long experience in the industrial, commercial and residential fields positions and qualifies it to undertake the construction and maintenance of renewable energy systems from the generation facility to the end user.

***Cimarron Leasing and Finance (CLF)*** This division's purpose is to acquire and provide funding to support CPPE, CLPS and JES' operations. As well as providing funding to individuals or entities that wish to utilize services and products available from those divisions. CLF will also solicit and provide funding and financing services to any other entity or individuals that wish to acquire and utilize products not only in the alternative energy industry but products available for the following industries agriculture, manufacturing, transportation, electrical, construction, communications, medical, security, recreational.

It was the writer's intent to establish to the reader that CPPE in association with the companies show above present a single, aggressive and innovative operating entity to participate and be a leader in the alternative energy and distributed generation industry serving and providing opportunities to not only individuals or entities wishing to generate transmit and market power, but also supply the products and services needed by the utilizer whether they be tax supported, public, private entities or individual homeowners.

Respectfully,

James A. Schaeffer  
President/CEO
