

# enXco Development Corporation

**Wind Energy Development Meeting**

**Deubrook Area Elementary School,  
Toronto, S.D**

**Ian Krygowski  
Regional Project Development Manager**

**July 31, 2007**

## About enXco

- Developer, Owner and Operator of utility scale wind energy projects [www.enXco.com](http://www.enXco.com)
- 20 years of experience in the wind industry
- Gradually including other renewable generating technologies in development plans
- Midwest Region headquarters in Minneapolis, MN
- 400 MW of new wind energy projects currently under construction in the Upper Midwest

## Development History

- Began work in South Dakota in 1998
- Work focused in three areas
  - Site Identification and Assessment
  - Advocacy for creation of a regional market
  - Transmission assessment and planning
- Three sites identified in Eastern South Dakota

## Current Activities

- Passage of RPS in MN and WI finally creating a Regional Market
- Focus is now on site development at existing locations and on transmission work
- More visible in the communities than in previous years

## Future Activities

- Transmission planning
  - More lines will be needed to fully realize South Dakota's potential
- Advocacy for a National Market
  - Support for a National RPS
- New Site Identification
  - Many viable areas for development across the state

## What Can You Do?

- Support efforts for new transmission
- Support National Renewable Legislation like the extension of the PTC and the National RPS
- Prepare for Development in Advance
  - Consider how you want wind to be developed in your community
  - Do current zoning and permitting requirements support that vision?
